No Disasters Found

Narratives

Executive Summary:

The 2013 Rim Fire destroyed 257,314 acres of land in Tuolumne County and ranks as the third largest wildfire in State history. The fire burned for over two months through large portions of the Stanislaus National Forest, threatening surrounding communities and damaging the critical watershed for local communities, the San Joaquin Valley, and San Francisco (City/County). Unfortunately, the Rim Fire is not an isolated incident. In 2016, a total of 2,986 fires consumed 564,835 California acres. Despite a record snowfall, 2,134 fires have consumed 22,817 acres in California during the period between January 1 and June 18, 2017.

The Rim Fire's direct emergency response cost was \$127 million and estimates of environmental damage range up to \$736 million. In September 2015, the Valley and Butte Fires burned over 145,000 acres, destroyed 2,728 structures and resulted in 7 deaths. California's prolonged severe drought and related epidemic tree mortality magnifies risk, coupled with 2017's above average rain and snow fall levels which creates fuel loading grasses and vegetation that can readily be ignited in summer thunderstorms.

Fires have serious consequences for local communities, including public health impacts, property damage, and economic disruption. They also threaten the backbone watersheds of the State's water system; sixty percent of the State's water supply originates in California's Sierra Nevada region.

The Community and Watershed Resilience Program (CWRP) provides an innovative, revenue-generating, scalable, and replicable model for similar regions throughout California and the western United States. Developed in partnership with federal and local government agencies, community organizations, and private business, the CWRP is built around partnerships and practices designed to overcome the financial and institutional barriers to sustainable, healthy forests and watersheds. The CWRP will also facilitate the transition to a sustainable forest economy in our rural communities.

The State of California's Community and Watershed Health Resilience Program is composed of activities in three integrated pillars: 1). Forest and Watershed Health Activities include forest thinning, biomass removal, restoration, and reforestation within the Rim Fire burn area, designed to improve forest and watershed health and resilience against disturbances; 2). The Integrated Biomass and Wood Products Facility will provide clean power, cooling and heating, and a wood products facility to utilize biomass material removed from the impacted disaster area; and 3). A Community Resilience Center, designed to increase community resilience by providing year round services, including education and job training to support forest and watershed work and the biomass facility. This facility will be a model for serving rural communities.

The State of California requested a waiver to reduce the LMI National Objective requirement from 51% to 38%. The demographics of the declared disaster (MID URN) area, includes a high population of seasonal residents and retirees. The area lacks access to education and jobs, 14.5% of the county residents live in poverty, 12% have not completed high school and 51% of the county households are over age 60. HUD has not officially responded to the State's waiver request.&nbs

Executive Summary:

p; If, based on the results of the Biomass Utilization Facility feasibility study, it is determined that using the Low-Moderate Jobs National Objective is the best approach, no LMI waiver would be necessary for the Biomass Utilization Facility funding.

MID-URN Areas:

MID-URN AREAS: The Target Area includes the Rim Fire burn and evacuation and evacuation waring areas (Rim Fire Burn Scar, Evacuation Areas) in Census Tracts 06109002200, 06109004100, 06109003100, 06109003200, 06109004200. The State is incorporating resilience and replicability for forest and watershed health activities. This includes thinning, creating fuel breaks, reforestation, biomass removal, rangeland improvements and noxious weed treatments to reestablish carbon storage in living

trees, help prevent future fires, reduce invasive species, and provide jobs and revenues to help build strong rural economies. The biomass facility will provide a marketable end-use for biomass removed from within the county, lessen Tuolumne County's reliance on imported energy, reducing greenhouse gases, and producing jobs in the region. The Community Resilience Center (CRC) will provide social resilience to Tuolumne and surrounding counties. Tuolumne County is a regional leader in responding to disaster, with the region's only food bank and major evacuation center. Therefore, during emergencies in neighboring counties, they often turn to Tuolumne County for support. The proposed resilience centers will be located in a community selected with input from the communities in the County. The Rim Fire destroyed permanent public infrastructure, including the ingress egress road systems, as well as erosion and landslides that undermine the integrity of the system and wear and tear from ongoing fire recovery efforts have caused additional damage. The Rim Fire destroyed rangelands, fencing, and water troughs that had been in use by cattle ranchers under long-term agreements with the USFS and now prevents grazing in the forest. The damage from the Rim Fire has long-lasting effects well beyond the forests. Local communities, which are closely linked to the health of forests through timber, wood products, the recreation industry and tourism, continue to suffer from the business losses and closures caused by the fire, the direct public health impacts, and depressed property values. Damage to downstream water storage and supply, as well as the long-term implications for carbon storage, all have global effects. From a regional perspective, the Target Area has experienced regular wildfire events, as shown in the Tuolumne Burn History Map. The 1987 Complex Fire burned 157,000 acres in Tuolumne County, much of which burned again in the Rim Fire. Natural regeneration of trees following wildfires that burn as hot as the Complex and Rim fires is often insufficient, resulting in conversion from forest to grass and shrub lands, which are more susceptible to high severity fires and store substantially less carbon than healthy forests. (Maps identified in this section are located on the State of California's Department of Housing and Community Development website.)

Key Agencies, Partners, Positions, Personnel:

Awardee;
 State of California Department of Housing and Community Development
 Lisa Bates, Deputy Director
 Susan Naramore, Specialist II
 Patrick Talbot, HCD Representative II
 Karen Patterson, Section Chief
 Amanda Ohman, Staff Services Manager I

Primary Project Management and Implementation Responsibilities:
 State of California's Governor's Office of Planning and Research (OPR)
 Louise Bedsworth, Deputy Director

Technical Assistance and Collaborative Project Partnerships between federal, state and local agencies:
 The Sierra Nevada Conservancy (SNC)
 Angela Avery, Chief, Policy and Outreach Division
 Elliott Vander Kolk, NDRC Project Coordinator

Fuel Break Activities:
 California Department of Forestry and Fire Protections (CAL FIRE)
 Matthew Reischman, Assistant Deputy Director

Community Resilience Center:
 Tuolumne County
 Maureen Frank, Deputy County Administrator

California Environmental Protection Agency
 Ashley Conrad-Saydah, Deputy Secretary, Climate Policy

United States Forest Service
 Maria Benech, Rim Fire Restoration Coordinator

California Conservation Corp
 Amy Cameron, Chief Deputy Director

National Objective	Target	Actual
Low/Mod	\$35,179,729.50	\$38,067,250.00

Overall Progress Narrative:

Forest and Watershed Health Program (FWHP): On May 30, 2017, HCD entered into a grant agreement with Sierra Nevada Conservancy (SNC) to provide FWHP program management services. HCD completed the grant agreement with California Department of Forestry and Fire Projection (CALFIRE). The agreement is pending execution by both parties. HCD is in the process of converting the standard grant agreement into a Cooperative Endeavor Agreement (CEA) for use with United States Forest Service (USFS). The CEA will include the USFS required Collection Agreement. Training and Technical Assistance: GCR, HCD technical assistance provider, conducted a CDBG grant administration overview and monitoring preparation training on June 26 and 27, 2017 for USFS and CALFIRE staff.

FWHP Reforestation and Biomass Removal Activities: NEPA/CEQA: HCD has assumed the role of “lead agency” for CEQA environmental review. As lead agency, HCD has developed a request for CEQA exemption as allowed under the Governor’s emergency declaration for the Rim Fire.

Planning and Citizen Participation: SNC staff has conducted stakeholder outreach as part of determining the final allocation of FWHP funding between the three activities of Reforestation, Rangeland construction, Fuel Break expansions. SNC also had a number of public meetings in local communities to discuss how much reforestation could be paid for and where the best location were for reforestation to take place.

Reforestation Activities: No reforestation activities have started.

FWHP Rangeland Construction Activities: NEPA/CEQA: Project one under the Rangeland activities has already received a CEQA exemption from the state. For project two, HCD has assumed the role of “lead agency” for CEQA environmental review and has developed a request for CEQA exemption, as allowed under the Governor’s emergency declaration for the Rim Fire. HCD as “Responsible Entity” for NEPA will be conducting two separate NEPA reviews, one for each project.

Planning and Citizen Participation: USFS staff are in contact with stakeholders who will be consulted as

part of finalizing the scope of work for each project.

Rangeland Construction Activities: No rangeland activities have started.

FWHP Fuel Break Activities:

NEPA/CEQA: HCD has started to draft an RFP for a NEPA/CEQA consultant who will assist with environmental compliance. HCD has assumed the role of “Lead Agency” for CEQA environmental review and “Responsible Entity for NEPA. HCD and procured consultant will conduct a joint NEPA/CEQA review for all the fuel breaks.

Planning and Citizen Participation: SNC and USFS staff have conducted stakeholder outreach as part of determining the final number and location of proposed fuel breaks. USFS has mapped out the approximate location and size of the expanded fuel breaks and the one new fuel break. GCR has conducted a duplication of benefit analysis and HCD has used it to verify that no other funding is available for the proposed fuel breaks. USFS has agreed to be the contracting agency on the fuel break work and CALFIRE will coordinate work with local landowners. This agreement will be formalized.

Fuel Break Activities: No fuel break activities have started.

Activity Progress Narrative:

The County has released a Request for Proposal (RFP) to hire a consultant who will assist with grant administration, community outreach and participation, managing federal overlay compliance, specifically providing labor standard compliance oversight. HCD has formed a "working group" with partners who meet twice a month to coordinate CRC planning and development activities. GCR has developed a standardized filing system with checklists for use in managing the grant reporting and federal compliance. GCR and HCD are developing a software system that the County will use to submit reports and tracking project expenditures, timelines and compliance. Training and Technical Assistance: County received a four hour federal procurement training from GCR Inc., HCD's technical assistance (TA) consultant. GCR has been providing ongoing procurement TA as the county moves forward with hiring of a grant administration consultant and project architect. HCD also provided two full days of CDBG compliance training by Cloudburst on February 21-22, 2017, which the County staff attended. In addition, HCD

paid Cloudburst to do a CDBG procurement webinar on April 26, 2017, which the County participated and which is posted on the HCD webpage. GCR also conducted a grant administration overview and monitoring preparation training on June 26, 2017.

Activity Description:

Construction of 1 or more Community Resilience Centers (under the public facility activity) for the residents of the Rim Fire impacted area of Tuolumne County and the surrounding areas. The center(s) will provide a regional food bank, employment training and will function as an evacuation center in the event of a disaster.

Location Description:

The feasibility study will determine if the communities are best served with one or more Community Resilience Centers (CRC). The location of the CRC will not be known until the feasibility studies have been completed and possible properties have been identified. Specific site selection will begin September, 2018.

Activity Description:

Removal of dead trees for fuel reduction and to support the development of a biomass energy and wood products facility. Forest restoration through the planting of resilient and diverse non-invasive trees in the Rim Fire burn scar areas. The activity will reduce the risk of large damaging wildfires that threaten communities, and will restore forest and watershed health for the communities located in the area and a large portion of the most heavily populated Bay Area of Northern California. This project will support healthy, resilient forests through restoration, reforestation, strategic thinning and other science-based investments to ensure ecosystems health.

Location Description:

Throughout the 254,000 acre Rim Fire burn scar. Census tract numbers for the Forest and Watershed Health project are 06109003100 and 06109003200.

Activity Progress Narrative:

Forest and Watershed Health Program (FWHP): On May 30, 2017, HCD entered into a grant agreement with Sierra Nevada Conservancy (SNC) to provide FWHP program management services.

Planning and Citizen Participation: SNC and USFS staff have conducted stakeholder outreach as part of determining the final number and location of proposed fuel breaks. USFS has mapped out the approximate location and size of the expanded fuel breaks and the one new fuel break. GCR has conducted a duplication of benefit analysis and HCD has used it to verify that no other funding is available for the proposed fuel breaks. USFS has agreed to be the contracting agency on the fuel break work and CALFIRE will coordinate work with local landowners. This agreement will be formalized.

Fuel Break Activities: No fuel break activities have started.

HCD completed the grant agreement with California Department of Forestry and Fire Projection (CALFIRE). The agreement is pending execution by both parties. HCD is in the process of converting the standard grant agreement into a Cooperative Endeavor Agreement (CEA) for use with United States Forest Service (USFS). The CEA will include the USFS required Collection Agreement.

Training and Technical Assistance: GCR, HCD technical assistance provider, conducted a CDBG grant administration overview and monitoring preparation training on June 26 and 27, 2017 for USFS and CALFIRE staff.

FWHP Reforestation and Biomass Removal Activities: NEPA/CEQA: HCD has assumed the role of "lead agency" for CEQA environmental review. As lead agency, HCD has developed a request for CEQA exemption as allowed under the Governor's emergency declaration for the Rim Fire.

Planning and Citizen Participation: SNC staff has conducted stakeholder outreach as part of determining the final allocation of FWHP funding between the three activities of Reforestation, Rangeland construction, Fuel Break expansions. SNC also had a number of public meetings in local communities to discuss how much reforestation could be paid for and where the best location were for reforestation to take place.

Reforestation Activities: No reforestation activities have started.

FWHP Rangeland Construction Activities: NEPA/CEQA: Project one under the Rangeland activities has already received a CEQA exemption from the state. For project two, HCD has assumed the role of "lead agency" for CEQA environmental review and has developed a request for CEQA exemption, as allowed under the Governor's

emergency declaration for the Rim Fire. HCD as “Responsible Entity” for NEPA will be conducting two separate NEPA reviews, one for each project.

Planning and Citizen Participation: USFS staff are in contact with stakeholders who will be consulted as part of finalizing the scope of work for each project.

Rangeland Construction Activities: No rangeland activities have started.

FWHP Fuel Break Activities: NEPA/CEQA: HCD has started to draft an RFP for a NEPA/CEQA consultant who will assist with environmental compliance. HCD has assumed the role of “Lead Agency” for CEQA environmental review and “Responsible Entity for NEPA. HCD and procured consultant will conduct a joint NEPA/CEQA review for all the fuel breaks.

Activity Description:

The feasibility study will determine the best method of developing the Biomass facility (as a public facility or as an economic development activity that will create jobs), the possible entities that are available to participate, and the highest and best locations for siting the Biomass facility.

Location Description:

The location of the Biomass facility(ies) will not be known until the feasibility study has been completed. Until the location is known, the number of persons (Low, Mod and non-Low/Mod) will not be known (if the project moves forward as a public facility, which will not be known until the feasibility study is completed). Percentages of Low/Mod persons within Toulumne County do not meet or exceed 51%; a waiver for the Low/Mod percentages has been requested from HUD.

If the feasibility study indicates the best path for developing the Biomass facility is to make a loan to a for- or non-profit business, the national objective will be jobs and the number of total and low- and/or moderate-jobs created will be reported. This planning activity will be conducted throughout the County of Tuolumne, census tracts reflected in the following list of type; code; name; and sheets:

TRACT;06109001100;11;1 TRACT;06109001200;12;1 TRACT;06109002100;21;1 TRACT;06109002200;22;1

Activity Progress Narrative:

SNC staff have worked with HCD and GCR to develop a RFP for a consulting to conduct a feasibility study for the BUF. The RFP is now being reviewed by California State Department of General Services, as required by state procurement policies. HCD has compiled a list of interested parties who have expressed interest in conducting the BUF feasibility analysis.

Activity Description:

On April 29, 2015, Governor Brown established a 2030 greenhouse gas emission reduction target and a multi-part resilience program, which requires state agencies to:

- incorporate climate change into all state planning investment,
- prioritize the use of natural and green infrastructure, and
- use full life cycle cost accounting in infrastructure planning decisions.

The Governor's Office of Planning and Research is leading a Technical Advisory Group to assist in the implementation of the Executive Order.

Implementation strategy work is ongoing.

Activity Description:

The State is working with local and regional business incubators in Tuolumne County to expand financing opportunities for local small business and start-ups, with workforce development opportunities included. The long-term goal is that financing for these actions will be pursued through eventual revenue generation of the biomass facilities. In addition, the State collaborated with Blue Forest Conservation to develop a mechanism to attract private capital for forest and watershed work, based on the pay for success model.

Activity Description:

Voters approved Proposition 1 to develop a sustainable water systems and include:

-Integrated Regional Water Management (IRWM): IRWM regions that together cover 87 percent of the state's area and 99 percent of its population. IRWM implementation grants have helped make more than 600+ IRWM projects identified in IRWM plans a reality across the state. Phase .A draft solicitation, released for public comment 4/21/17, will fund support planning and implementation efforts within hydraulic regions identified in the 2013 CA Water Plan. Tuolumne County is located in the Mountains Counties hydraulic region and is eligible to apply for \$13M in IRWM funds.

-Dept of Fish & Wildlife Watershed Restoration & Delta Water Quality and Ecosystem Restoration Grants Program: The Dept of Fish & Wildlife announced a total of 5 awards totaling over \$9.4M due to the augmentation of funding from the Water Quality, Supply and Infrastructure Improvement Act of 2014 (Proposition 1) in the 2016-17 Budget Act.

-Sierra Nevada Conservancy awarded \$25M in Proposition 1 funds; 22 for site improvement projects and 10 for planning projects. Projects include fuel treatment to reduce wildfire risk, protect watershed health, forest health, protect life and property, and reduce greenhouse gasses. This in an ongoing program.

Activity Description:

Coordinated, integrated, collaborative program of projects to restore the health of California's primary watershed. Identifies and quantifies the level of restoration needed in order to restore the Sierra, increase investment in restoration activities, and identify and address State, Federal and local policy barriers to proactively managing watersheds. The Program will achieve these goals through science-based strategies that are collaboratively developed at the watershed scale to create resiliency at the regional and State level.

Location Description:

State of California; focusing on watershed areas
