Enterprise Zone Program

MANAGEMENT MEMORANDUM
Memorandum Number 11-01

Date: **January 3, 2011**

TO: **All G-TEDA Administrators**

From: **John Nunn, Jr.**
              Enterprise Zone Program Manager

SUBJECT: Voucher Numbers – 2011 Allocations

_____

Requirement for Voucher Numbers

The California Code of Regulations requires enterprise zones and other state Geographically-Targeted Economic Development Areas (G-TEDAs) to sequentially identify vouchers issued, using numbers allocated by the Department of Housing and Community Development (Department). See Attachment A for a list of the designated ranges.

To adhere to the requirement for a voucher number, vouchering agents should assign a number from their designated range to each voucher issued as of January 1, 2011. The vouchering agent should place the assigned number in the box located in the upper right-hand corner of the state issued Voucher Certificate.

Allocations Made to Enterprise Zones

The requirement for a number applies to vouchers issued by all of the G-TEDAs. Because the regulations allow expired and some conditional enterprise zones, as well as existing zones, to issue vouchers, we have allocated separate numbers to each of these zones. As a result, jurisdictions which have both an expired and a newly-designated enterprise zone will need to distinguish between the vouchers issued by these zones. For example, if a single vouchering agent processes applications for both the previous and new zone, the agent cannot use the numbering sequence for the newly designated zone to number a voucher attributable to the expired zone, and vice versa. In this example, the vouchering agent will need to ensure that the jurisdictions use the numbering range assigned to the enterprise zone to which the vouchers correspond.

Enterprise Zones May Allocate Ranges to Jurisdictions

The range of numbers allocated to the enterprise zones permits them to number up to 9,999 vouchers. If an enterprise zone has more than one jurisdiction and vouchering agent, it may assign part of its range to the other jurisdictions. For example, Enterprise Zone ABC may assign Jurisdiction A the range of ABC-11-0001 to ABC-11-2999, Jurisdiction B the range of ABC-11-3000 to ABC-11-5999, and Jurisdiction C the range of ABC-11-6000 to ABC-11-9999. Each of the jurisdictions would use its respective range to number the vouchers it issued. In this way, Jurisdictions A, B, and C will observe the requirement and designated range, but may continue to separately process vouchers issued through the enterprise zone.

> *Exception: The Department will permit the enterprise zones administered by the Cities of Los Angeles and San Jose to use one set of numbers for their respective zones to accommodate their data processing systems. However, each of these zones must maintain the alphanumeric code assigned to them (e.g., XLAC-11, LAES-11, etc.).*

Newly Designated Zones

The newly designated zones from Round 2010: Anaheim and Harbor Gateway Communities as well as those conditionally designated zones from Round 2009: Pittsburg/Contra Costa, Sequoia Valley (formerly known as Tulare), and Taft are all allocated voucher numbers in Attachment A for use when these jurisdictions receive Final Designation. No vouchering or other enterprise benefits may be utilized until then. The new Santa Clarita Valley zone has been assigned new voucher numbers and as it is continuing enterprise zone, vouchers may be issued immediately.

Requests for More Allocations

The numbering sequence described in Attachment A should be used for any vouchers issued in 2011. The Department will issue a new sequence each calendar year. If the allocated range is exhausted before the end of the calendar year, the Department should be contacted for a new allocation.

Report on Voucher Activity

The requirement for a number will apply to each voucher issued. Although it is not required to assign a number to the applications that are denied, a record should be maintained of those applications so that the Department can track and monitor the number of applications accepted (as opposed to approved). To record this activity, the Department recommends that a log or table be established that identifies key dates and results for each application. This information should include the date the application was received and specific distinguishing characteristics, such as the business and employee name. See Attachment B for the suggested format. At the end of the calendar year, the Department will request a breakdown of the number of applications approved, denied, and pending. If requested by the Department, information may need to be provided on the total vouchers issued by voucher number.

Contact Information: If you have any questions about the Department's voucher numbering system, please call Gail Tillman-Mitchell at (916) 327-3609.

Allocation Of
Voucher Numbers

Year: 2011

Instructions: Each economic development area should use its corresponding numbering sequence listed below for each voucher it issues from January 1, 2011, through December 31, 2011. Enterprise Zones that consist of more than one jurisdiction <u>and</u> more than one vouchering agent may divide their allotment of voucher numbers among their respective jurisdictions. For example, an enterprise zone with two vouchering agents can allot the sequence 11-0001 to 11-4999 to the first agent and 11-5000 to 11-9999 to the second agent.
