Local Government Tribal Consultation List Request

Attachment 1: Specific Area Subject to Proposed Action

The following California counties are subject to the proposed action:

1. Butte
2. Lake
3. Los Angeles
4. Shasta
5. Ventura

Local Government Tribal Consultation List Request

Attachment 2: Project Description

In 2018, the Camp, Carr, Mendocino Complex Fire, and Woolsey Fires erupted in California and resulted in two presidential major disaster declarations, DR-4382 for Shasta and Lake Counties; and DR-4407 for Butte, Los Angeles, and Ventura Counties. Following the federally declared disasters, the State of California's Department of Housing and Community Development (HCD) is serving as the lead and responsible agency for administering the Community Development Block Grant – Disaster Recovery (CDBG-DR) from the U.S. Department of Housing and Urban Development to support long-term recovery efforts.

The 2018 CDBG-DR program will provide grants to owner-occupied homeowners to rehabilitate or reconstruct homes damaged or destroyed by the devastating wildfires. Under the CDBG-DR funding umbrella, HCD has established an Owner-Occupied Rehabilitation and Reconstruction Program (the "Program") to support long-term recovery efforts and address unmet housing needs in areas impacted by the 2018 disasters. The program is designed to ensure that the housing needs of very-low, low- and moderate-income households and vulnerable populations are addressed to the greatest extent feasible.

The Program will allow affected residents to apply directly to the State for gap financing grants to repair or reconstruct their single-family homes. Projects under the Program are expected to involve repair/rehabilitation or reconstruction of single-family dwellings, such as stick built, modular, or manufactured housing units. Reconstruction has been defined by the Program as the rebuilding of a structure on the same site in substantially the same footprint and manner, except in Butte County. Due to widespread devastation from the 2018 Camp Fire in the Town of Paradise, Butte County, some homes in Paradise may have to be rebuilt on different portions of the same property (i.e. outside of the original footprint) to accommodate the complex Town-wide rebuilding process. A reconstructed property must not increase the number of dwellings on site, although the number of rooms may increase or decrease.

In accordance with 24 CFR Part 58, HCD is facilitating the federally-required environmental reviews for the Program in Butte, Lake, Los Angeles, Shasta, and Ventura Counties.

As specified in the State of California, August 2020 *Action Plan for Disaster Recovery*, the best currently available data suggests that approximately 1,300 homeowners may seek funding through this program. Individual project sites will be reviewed as part of Tier 2 once those sites are identified.

The proposed projects will be occurring in five counties and could potentially occur in areas where tribal cultural and traditional affiliations may exist.

The Program will consist of the following types of single-family housing unit projects:

1. Repairs to disaster-damaged primary structures;
2. Reconstruction of the disaster-damaged primary structure;
3. Upgrades required to meet current building code (including the 2019 Building Energy Efficiency Standards, where applicable);
4. Replacement of fire damaged or destroyed necessary equipment, such as HVAC units or septic systems;
5. Handicap accessibility features;
6. Repair and replacement of manufactured housing units;
7. Site work to meet California Wildland Urban Interface standards for homes in high risk areas;
8. Addition of handicap accessibility features (if applicable); and,
9. Lead-based paint and asbestos abatement (if applicable).
