Narratives

Executive Summary:

The 2013 Rim Fire destroyed 257,314 acres of land in Tuolumne County and ranks as the third largest wildfire in State history. The fire burned for over two months through large portions of the Stanislaus National Forest, threatening surrounding communities and damaging the critical watershed for local communities, the San Joaquin Valley, and San Francisco (City/County). Unfortunately, the Rim Fire is not an isolated incident. In 2016, a total of 2,986 fires consumed 564,835 California acres. Despite a record snowfall, 2,134 fires have consumed 22,817 acres in California during the period between January 1 and June 18, 2017.

The Rim Fire's direct emergency response cost was \$127 million and estimates of environmental damage range up to \$736 million. In September 2015, the Valley and Butte Fires burned over 145,000 acres, destroyed 2,728 structures and resulted in 7 deaths. California's prolonged severe drought and related epidemic tree mortality magnifies risk, coupled with 2017's above average rain and snow fall levels which creates fuel loading grasses and vegetation that can readily be ignited in summer thunderstorms.

Fires have serious consequences for local communities, including public health impacts, property damage, and economic disruption. They also threaten the backbone watersheds of the State's water system; sixty percent of the State's water supply originates in California's Sierra Nevada region.

The Community and Watershed Resilience Program (CWRP) provides an innovative, revenue-generating, scalable, and replicable model for similar regions throughout California and the western United States. Developed in partnership with federal and local government agencies, community organizations, and private business, the CWRP is built around partnerships and practices designed to overcome the financial and institutional barriers to sustainable, healthy forests and watersheds. The CWRP will also facilitate the transition to a sustainable forest economy in our rural communities.

The State of California's Community and Watershed Health Resilience Program is composed of activities in three integrated pillars: 1). Forest and Watershed Health Activities include forest thinning, biomass removal, restoration, and reforestation within the Rim Fire burn area, designed to improve forest and watershed health and resilience against disturbances; 2). The Integrated Biomass and Wood Products Facility will provide clean power, cooling and heating, and a wood products facility to utilize biomass material removed from the impacted disaster area; and 3). A Community Resilience Center, designed to increase community resilience by providing year round services, including education and job training to support forest and watershed work and the biomass facility. This facility will be a model for serving rural communities.

The State of California requested a waiver to reduce the LMI National Objective requirement from 51% to 38%. The demographics of the declared disaster (MID URN) area, includes a high population of seasonal residents and retirees. The area lacks access to education and jobs, 14.5% of the county residents live in poverty, 12% have not completed high school and 51% of the county households are over age 60. HUD has not officially responded to the State's waiver request. If, based on the results of the Biomass Utilization Facility feasibility study, it is determined that using the Low-Moderate Jobs National Objective is the best approach, no LMI waiver would be necessary for the Biomass Utilization Facility funding.

MID-URN Areas:

MID-URN AREAS: The Target Area includes the Rim Fire burn and evacuation and evacuation waring areas (Rim Fire Burn Scar, Evacuation Areas) in Census Tracts 06109002200, 06109004100, 06109003100, 06109003200, 06109004200. The State is incorporating resilience and replicability for forest and watershed health activities. This includes thinning, creating fuel breaks, reforestation, biomass removal, rangeland improvements and noxious weed treatments to reestablish carbon storage in living trees, help prevent future fires, reduce invasive species, and provide jobs and revenues to help build strong rural economies.

The biomass facility will provide a marketable end-use for biomass removed from within the county, lessen Tuolumne County’s reliance on imported energy, reducing greenhouse gases, and producing jobs in the region.

The Community Resilience Center (CRC) will provide social resilience to Tuolumne and surrounding counties. Tuolumne County is a regional leader in responding to disaster, with the region’s only food bank and major evacuation center. Therefore, during emergencies in neighboring counties, they often turn to Tuolumne County for support. The proposed resilience centers will be located in a community selected with input from the communities in the County.

The Rim Fire destroyed permanent public infrastructure, including the ingress egress road systems, as well as erosion and landslides that undermine the integrity of the system and wear and tear from ongoing fire recovery efforts have caused additional damage. The Rim Fire destroyed rangelands, fencing, and water troughs that had been in use by cattle ranchers under long-term agreements with the USFS and now prevents grazing in the forest.

The damage from the Rim Fire has long-lasting effects well beyond the forests. Local communities, which are closely linked to the health of forests through timber, wood products, the recreation industry and tourism, continue to suffer from the business losses and closures caused by the fire, the direct public health impacts, and depressed property values. Damage to downstream water storage and supply, as well as the long-term implications for carbon storage, all have global effects.

From a regional perspective, the Target Area has experienced regular wildfire events, as shown in the Tuolumne Burn History Map. The 1987 Complex Fire burned 157,000 acres in Tuolumne County, much of which burned again in the Rim Fire. Natural regeneration of trees following wildfires that burn as hot as the Complex and Rim fires is often insufficient, resulting in conversion from forest to grass and shrub lands, which are more susceptible to high severity fires and store substantially less carbon than healthy forests. (Maps identified in this section are located on the State of California’s Department of Housing and Community Development website.)

Key Agencies, Partners, Positions, Personnel:

Awardee;

State of California Department of Housing and Community Development

- Lisa Bates, Deputy Director
- Susan Naramore, Specialist II
- Patrick Talbott, HCD Representative II
- Karen Patterson, Section Chief
- Amanda Ohman, Staff Services Manager I

Primary Project Management and Implementation Responsibilities:

State of California’s Governor’s Office of Planning and Research (OPR)

- Louise Bedsworth, Deputy Director

Technical Assistance and Collaborative Project Partnerships between federal, state and local agencies:

The Sierra Nevada Conservancy (SNC)

- Angela Avery, Chief, Policy and Outreach Division
- Elliott Vander Kolk, NDRC Project Coordinator

Fuel Break Activities:

California Department of Forestry and Fire Protections (CAL FIRE)

- Matthew Reischman, Assistant Deputy Director

Community Resilience Center:

- Tuolumne County
- Maureen Frank, Deputy County Administrator

California Environmental Protection Agency

- Ashley Conrad-Saydah, Deputy Secretary, Climate Policy

United States Forest Service

- Maria Benech, Rim Fire Restoration Coordinator

California Conservation Corp

- Amy Cameron, Chief Deputy Director

Location Description:

Throughout the 254,000 acre Rim Fire burn scar. Census tract numbers for the Forest and Watershed Health project are 06109003100 and 06109003200.

Activity Description:

Removal of dead trees for fuel reduction and to support the development of a biomass energy and wood products facility. Forest restoration through the planting of resilient and diverse non-invasive trees in the Rim Fire burn scar areas. The activity will reduce the risk of large damaging wildfires that threaten communities, and will restore forest and watershed health for the communities located in the area and a large portion of the most heavily populated Bay Area of Northern California. This project will support healthy, resilient forests through restoration, reforestation, strategic thinning and other science-based investments to ensure ecosystems health.

Activity Description:

On April 29, 2015, Governor Brown established a 2030 greenhouse gas emission reduction target and a multi-part

resilience program, which requires state agencies to:

- incorporate climate change into all state planning investment,
- prioritize the use of natural and green infrastructure, and
- use full life cycle cost accounting in infrastructure planning decisions.

The Governor's Office of Planning and Research is leading a Technical Advisory Group to assist in the implementation of the Executive Order.

Implementation strategy work is ongoing.

Activity Description:

Voters approved Proposition 1 to develop a sustainable water systems and include:

-Integrated Regional Water Management (IRWM): IRWM regions that together cover 87 percent of the state's area and 99 percent of its population. RWM implementation grants have helped make more than 600+ IRWM projects identified in IRWM plans a reality across the state. Phase .A draft solicitation, released for public comment 4/21/17, will fund support planning and implementation efforts within hydraulic regions identified in the 2013 CA Water Plan. Tuolumne County is located in the Mountains Counties hydraulic region and is eligible to apply for \$13M in IRWM funds.

-Dept of Fish & Wildlife Watershed Restoration & Delta Water Quality and Ecosystem Restoration Grants Program: The Dept of Fish & Wildlife announced a total of 5 awards totaling over \$9.4M due to the augmentation of funding from the Water Quality, Supply and Infrastructure Improvement Act of 2014 (Proposition 1) in the 2016-17 Budget Act.

-Sierra Nevada Conservancy awarded \$25M in Proposition 1 funds; 22 for site improvement projects and 10 for planning projects. Projects include fuel treatment to reduce wildfire risk, protect watershed health, forest health, protect life and property, and reduce greenhouse gasses. This in an ongoing program.

Activity Description:

Tuolumne County is currently in the process of updating its General Plan. The Draft Environmental Impact Report (EIR) was available for review on the County's website during a public comment period that ran from 12/7/15 through 2/5/16, with 2 public meetings 1/21/16.

The General Plan update includes the following:

-Economic Development: commitment to align County resources with agencies providing job training and business development for the Central Sierra Nevada region

-Natural Resource: support biomass energy facilities, manage invasive plants and vegetation removal for fuel reduction, and balance conservation with fire hazard reduction

-Water Resource: align goals with climate adaptation strategies at the state level, support water harvesting and storage, develop policies and programs to adapt to extreme climate effects such as drought and flooding

The County Planning Director retired during the process, creating a delay in completion. A Request For Proposal (RFP) for General Plan Services will be released late summer 2017. It is estimated that it will take 6-8 months to complete revisions to the County's General Plan and have the Plan revisions adopted.

Activity Description:

In 2013, the Tuolumne County Board of Supervisors voted to resurrect the County water agency "to ensure adequate water suppliers to meet the diverse needs of a healthy and economically viable community." In November 2014, the Board engaged professional facilitation to move the initiative forward. The goal is to discuss the hydrologic changes currently being experienced in the county and to consider potential future changes and their impacts. Given the fluctuations in climate conditions since the planning process began in 2013, scoping has taken longer than expected; the plan is anticipated to be completed 1/1/2018.

County of Tuolumne census tracts are reflected in the following list of type; code; name; and sheets:
 TRACT;06109001100;11;1 TRACT;06109001200;12;1 TRACT;06109002100;21;1 TRACT;06109002200;22;1
 TRACT;06109003100;31;1 TRACT;06109003200;32;1 TRACT;06109004100;41;1 TRACT;06109004200;42;1
 TRACT;06109005100;51;1 TRACT;06109005201;52.01;1 TRACT;06109985202;9852.02;1

Activity Description:

At this time, Tuolumne County does not have a public facility or resource that is available for the use as an evacuation center in disasters, nor as a resource for the public services that will be provided once the center is developed. The Community Resilience Center activity will result in a space for gathering, education, public services to be provided from, a public meeting space within Tuolumne County.

Dead and dying trees within the Rim Fire burn scar, and throughout the forests of the Sierra Nevada range pose additional risks as fuel for future wildfires that will occur. The Biomass Wood Products activity will result in resource utilization and enhancement, create financial partnerships, generate a non-fossil fuel energy source, conserving energy and reducing greenhouse gases. If economic development is determined as the best development option (vs. a public facility), the Biomass Wood Products facility will also result in jobs for low- and moderate-income individuals.

As stated above, dead and dying trees in the forest continue to be a risk for future wildfires. The Forest and Watershed Health activity will result in partnerships, conservation, resource enhancement, and provide an ecologically sustainable use of the dead and dying fuel.

All activities increase the occurrence of community outreach and result in a stronger community participation.

Grantee Activity Number: NDR-Outcome Values - Environmental
Activity Title: NDR-Outcome Values- Environmental

Activity Type:

NDR - Environmental Value

Project Number:

NDR-OV

Projected Start Date:

01/20/2016

No

Activity is being carried out through:

Organization carrying out Activity:

State of California - CDBG Program

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
State of California - CDBG Program	State Agency	\$ 0.00

Location Description:

Locations will be determined by the results of the feasibility studies for the Community Resilience Center and Biomass Wood Products activities, along with the Forest and Watershed Health being conducted within the Rim Fire Burn Scar. County of Tuolumne census tracts are reflected in the following list of type; code; name; and sheets:
 TRACT;06109001100;11;1 TRACT;06109001200;12;1 TRACT;06109002100;21;1 TRACT;06109002200;22;1
 TRACT;06109003100;31;1 TRACT;06109003200;32;1 TRACT;06109004100;41;1 TRACT;06109004200;42;1
 TRACT;06109005100;51;1 TRACT;06109005201;52.01;1 TRACT;06109985202;9852.02;1

Activity Description:

The Community Resilience Center activity will result in a space for gathering, education, public services to be provided from, a public meeting space within Tuolumne County. Currently, Tuolumne County does not have a public facility in the remote locations of the county, resulting in additional trips and use of fuel to travel to the county seat and back. Reducing the trip-miles will be beneficial in lowering green house gases. Design components will reduce the kWh usage, as well as water consumption on site.

The Biomass Wood Products activity will result in energy conservation and generation, resource utilization and enhancement, and financial partnerships. If economic development is determined as the best development option (vs. a public facility), the Biomass Wood Products facility will also result in jobs for low- and moderate-income individuals. Dead and dying trees release carbon; utilization of the fuel source is a way to reduce greenhouse gasses.

The Forest and Watershed Health activity will result in partnerships, conservation, resource enhancement, and an ecologically sustainable use of dead and dying fuel. Restoration of forest health will improve the ability of water to be absorbed into the ground, as well as stabilizing the soils by the replanning and reforestation efforts.

All activities increase the occurrence of community outreach and result in a stronger community participation.
