

California Interagency Council on Homelessness

Homeless Housing, Assistance and Prevention Round 4 Application

Application Information

Application Due Date: 11/29/2022

This Cognito platform is the submission portal for the Cal ICH HHAP-4 Application. You will be required to upload a full copy of the HHAP-4 Data Tables Template and enter information into the portal from specific parts of the HHAP-4 Local Homelessness Action Plan and Application Template as outlined below.

Please review the following HHAP-4 resources prior to beginning this application:

- [Homeless Housing, Assistance, and Prevention Program Statute](#)
- [HHAP-4 Local Homelessness Action Plan & Application Template](#) and
- [HHAP-4 Data Tables](#)

Application Submission for HHAP-4 Funding

Using the [HHAP-4 Local Homelessness Action Plan & Application Template](#) as a guide, applicants must provide the following information in the applicable form section (see below) to submit a complete application for HHAP-4 funding:

1. **Part I: Landscape Analysis of Needs, Demographics, And Funding:** the information required in this section will be provided in Tables 1, 2, and 3 of the HHAP-4 Data Tables file uploaded in the *Document Upload* section.
2. **Part II: Outcome Goals and Strategies for Achieving Those Goals:** the information required in this section will be provided in Tables 4 and 5 of the HHAP-4 Data Tables file uploaded in the *Document Upload* section, **AND** copy and pasted into the fields in the *Outcome Goals and Strategies* section of this application form.
3. **Part III: Narrative Responses:** the information required in this section will be provided by entering the responses to the narrative questions within the *Narrative Responses* section of this application form. Applicants are **NOT** required to upload a separate document with the responses to these narrative questions, though applicants may do so if they wish. The responses entered into this

Cognito form will be considered the official responses to the required narrative questions.

4. **Part IV: HHAP-4 Funding Plans and Strategic Intent Narrative:** the information required in this section will be provided in Tables 6 and 7 (as applicable), of the HHAP-4 Data Tables file uploaded in the *Document Upload* section, **AND** copy and pasted into the fields in the *Funding Plan Strategic Intent* section of this application form.
5. **Evidence of meeting the requirement to agendize the application at a meeting of the governing board** will be provided as a file upload in the *Document Upload* section.

How to Navigate this Form

This application form is divided into **seven sections**. The actions you must take within each section are described below.

- **Applicant Information:** In this section, indicate (1) whether you will be submitting an individual or joint application, (2) list the eligible applicant jurisdiction(s), and (3) provide information about the Administrative Entity.
- **Document Upload:** In this section, upload (1) the completed HHAP-4 Data Tables as an Excel file, (2) evidence of meeting the requirement to agendize the application at a regular meeting of the governing board where public comments may be received, and (3) any other supporting documentation you may wish to provide to support your application.
- **Part I. Landscape Analysis:** In this section, answer the questions confirming that Tables 1, 2, and 3 have been completed and included in the HHAP-4 Data Tables file uploaded in the previous section.
- **Part II. Outcome Goals and Strategies:** In this section, copy and paste your responses from Tables 4 and 5 of the completed HHAP-4 Data Tables.
- **Part III. Narrative:** In this section, enter your responses from Part III of the HHAP-4 Local Homelessness Action Plan & Application Template.
- **Part IV. HHAP-4 Funding Plan Strategic Intent Narrative:** In this section, enter your responses from Tables 6 and 7 of the completed HHAP-4 Data Tables file, and answer the narrative questions.
- **Certification:** In this section, certify that the information is accurate and submit the application.

Prior to the submission deadline, you can save your progress in this application and come back to it later by clicking the save button. This will provide you with a link to the saved application, and there will be an option to email that link to the email address(es) of your choosing.

After submitting the application, you will not be able to make changes to your responses unless directed by Cal ICH staff.

I have reviewed the HHAP-4 statute, FAQs, and application template documents

I am a representative from an eligible CoC, Large City, and/or County

Yes

Applicant Information

List the eligible applicant(s) submitting this application for HHAP-4 funding below and check the corresponding box to indicate whether the applicant(s) is/are applying individually or jointly.

Eligible Applicant(s) and Individual or Joint Designation

Individual

This application represents the individual application for HHAP-4 funding on behalf of the following eligible applicant jurisdiction(s):

Eligible Applicant Name

CA-609 San Bernardino City & County CoC

Administrative Entity Information

Funds awarded based on this application will be administered by the following Administrative Entity:

Administrative Entity

San Bernardino County Office of Homeless Services

Contact Person

Nicholas Miller

Title

Administrative Supervisor I

Contact Person Phone Number

(909) 501-0612

Contact Person Email

nicholas.miller@hss.sbcounty.gov

***Agreement to Participate in HDIS and HMIS**

By submitting this application, we agree to participate in a statewide Homeless Data Integration System, and to enter individuals served by this funding into the local Homeless Management Information System, in accordance with local protocols.

Document Upload

Upload the completed [HHAP-4 Data Tables](#) (in .xlsx format), evidence of meeting the requirement to agendize the application at a regular meeting of the governing body where public comments may be received (such as a Board agenda or meeting minutes), and any other supporting documentation.

Part II. Outcome Goals and Strategies for Achieving Those Goals

Copy and paste your responses to Tables 4 and 5 from the [HHAP-4 Data Tables](#) into the form below. All outcome goals are for the period between July 1, 2022 and June 30, 2025.

Table 4: Outcome Goals

Name of CoC

CA-609 San Bernardino City & County CoC

1a. Reducing the number of persons experiencing homelessness.

Goal Statement

By the end of the performance period, HDIS data for San Bernardino County and the City and County of San Bernardino CoC will show 10,031 total people accessing services who are experiencing homelessness annually, representing 2,025 more people and a 25% increase from the baseline.

Goal Narrative

By the end of the performance period, HDIS data for San Bernardino County and the City and County of San Bernardino CoC will show 10,031 total people accessing services who are experiencing homelessness annually, representing 2,025 more people and a 25% increase from the baseline.

Baseline Data	Change in # of People	Change as % of Baseline	Target Annual Estimate of # of people accessing services who are experiencing homelessness

Describe Your Related Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:

Seniors receiving services has increased year to year, both unsheltered and sheltered compared to other populations.

The number of unsheltered adults over the age of 55 has increased by 135% since 2018. Since 2018, more than 1 out of 5 unsheltered individuals has been identified with life threatening/chronic health conditions.

Nearly half (43.5%) of the unsheltered adults identified in the 2022 PITC have experienced homelessness for more than 12 months in the last 3 years and have disabling health conditions.

African Americans are four times more likely to experience homelessness compared to individuals who identify as White.

Describe the trackable data goal(s) related to this Outcome Goal:

The CoC will accomplish the following towards this goal:

- The number of adults over the age of 55 accessing services leading to permanent housing stability will increase by 20%.
- The number of adults with chronic health, physical disabilities and other disabling conditions accessing

services leading to permanent housing stability will increase by 20%.

The County will complement the CoC through the following:

- Senior referrals to permanent housing options through the CES will increase by 15%.
- Work with cities and other partners to increase the supply of year-round permanent shelter by 200 beds throughout the county to accommodate diverse populations.
- Reduce the housing placement time for African Americans by 50%.

1b. Reducing the number of persons experiencing homelessness on a daily basis

Goal Statement

By the end of the performance period, data for San Bernardino County and the City and County of San Bernardino CoC will show 1,914 total people experiencing unsheltered homelessness daily, representing 475 fewer people and a 20% reduction from the baseline.

Goal Narrative

Within the 3-year outcome goal timeline presented the County and the CoC anticipate an annual reduction of 158 individuals captured through the annual point-in-time count. This will result in a decline of 475 individuals counted over a 3-year time period.

Baseline Data	Change in # of People	Change as % of Baseline	Target Daily Estimate of # of people experiencing unsheltered homelessness
2,389	475	-20%	1,914

Decrease/Increase in # of People

Decrease

Describe Your Related Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:

The number of people experiencing unsheltered homelessness on a daily basis has increased by 66% since 2018.

According to the Point-In-Time Count (PITC), 1,027 individuals identified as chronically homeless on the day of the 2022 PITC. This would be 3 chronically homeless individuals identified per week, who identify as the following: Seniors, chronic health conditions, physical disabilities, severely mentally ill re-entry pop. African Americans represent 8% of the population in San Bernardino County but represented 21% of the people experiencing unsheltered homelessness in 2020 and 18% in 2022. According to the Point-In-Time Count (PITC), there was an increase of 28% of shelter beds usage. Most of the increase usage was seen in families and seniors who identify as African American. One third of all individuals and families in shelter identify as Black/African American.

The number of unsheltered adults over the age of 55 has increased by 135% since 2018. Since 2018, more than 1 out of 5 unsheltered individuals has been identified with life threatening/chronic health conditions.

Based on the 2022 PITC, more than 1 out of 3 (37%) adults counted as unsheltered in 2022 identified having substance abuse issues and nearly 1 out of 3 (29%) identified having mental health issues.

An additional focus needs to be on young adult and youth-centered shelter services. One third of all residents in shelter are under the age of 25 years.

Describe the trackable data goal(s) related to this Outcome Goal:

The CoC will accomplish the following towards this goal:

- The number of African Americans experiencing unsheltered homelessness will decrease by 20%.
- The number of unsheltered adults over age 55 and persons with chronic health and/or other disabling conditions experiencing homelessness on a daily basis will decrease by 20%.

The County will complement the CoC through the following:

- Homelessness will decrease by 10% among persons who identify as Black/African American.
- Increase shelter utilization rate from 87% to 95%.
- 100% of shelters will be trained in trauma-informed approaches.
- Increase beds occupied by 200.

2. Reducing the number of persons who become newly homeless.

2. Reducing the number of persons who become newly homeless.

Goal Statement

By the end of the performance period, HDIS data for San Bernardino County and the City and County of San Bernardino CoC will show 3,551 total people become newly homeless each year, representing 625 fewer people and a 15% reduction from the baseline.

Goal Narrative

This goal will focus primarily on prevention. This will require a specific focus of federal and state resources dedicated to preventative activities to reduce the number of individuals and families who enter into homelessness for the first time. Actions will be coupled with municipalities efforts and school district efforts to reduce homelessness primarily through actions to assist special target groups as noted in the trackable goals as well as keeping individuals and families housed through rental assistance, utility payments, or rental arrears.

Baseline Data	Change in # of People	Change as % of Baseline	Target Annual Estimate of # of people who become newly homeless each year
4,176	625	-15%	3,551

Decrease/Increase in # of People
Decrease

Describe Your Related Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:

More than half of the people assisted through the homeless service system in 2020 (53%) became homeless for the first time.

75% of the persons who became homeless for the first time in 2020 were Hispanic/Latino or African American. 54% of the people who became homeless for the first time in 2020 were in households with at least 1 adult and 1 child.

African American households in general, African American single moms with children. African American households make up 9% of the population of San Bernardino County however, 40% of the individuals and persons in families within the Homeless Management Information System identify as Black/African American, 49% of whom became homeless for the first time. They are more than 4 times

disproportionately affected by homelessness than other populations in the County. This is even more reflective in the African American single moms with children target population. Almost 500 people experiencing significant mental illness became homeless for the first time in 2020. Over 400 unaccompanied youth 24 years of age and under became homeless for the first time in 2020. This age group are at higher risk of remaining homeless if intervention is not provided during this crucial time period, with many not having substantial social capital.

Describe the trackable data goal(s) related to this Outcome Goal:

The CoC will accomplish the following towards this goal:

- Number of families with children who become homeless for the first time will decrease by 15%.
- Number of Hispanic/Latino and African American households who become homeless for the first time will decrease by 15%.
- The number of transitional housing units available for transitional aged youth before they become homeless will increase by 15%.

The County will complement the CoC through the following:

- Increase housing placement for youth 24 years of age and under by an additional 25 placements per year.
- Increase transitional housing for youth by 20 units per year.
- Reduce the number of African American households who become homeless for the first time by a minimum of 25%.

3. Increasing the number of people exiting homelessness into permanent housing.

3. Increasing the number of people exiting homelessness into permanent housing.

Goal Statement

By the end of the performance period, HDIS data for San Bernardino County and the City and County of San Bernardino CoC will show 3,016 total people exiting homelessness into permanent housing annually, representing 609 more people and a 25% increase from the baseline.

Goal Narrative

As a result of the increased investments by the State and Federal governments in housing development, motel/hotel conversions, and ongoing voucher assistance the County and CoC estimate the creation of a potential hundreds of housing units to be made available in the subsequent years. San Bernardino County and cities within the region have already received substantial home key projects and will continue applying for funding and making additional program investments in PSH and RRH through funding received.

Baseline Data	Change in # of People	Change as % of Baseline	Target Annual Estimate of # of people exiting homelessness into permanent housing
2,407	609	25%	3,016

Decrease/Increase in # of People
Increase

Describe Your Related Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:

Only one-third (34%) of all persons assisted through the homeless service system in 2020 exited homelessness into permanent housing. Only 1 out of 5 (21%) unaccompanied youth (18-24) served through the homeless service system in 2020 exited homelessness into permanent housing. Only 26% of persons experiencing significant mental illness and only 17% of persons experiencing substance abuse disorder served through the homeless service system exited homelessness into permanent housing. Less than one-third (31%) of all persons served in emergency shelter or transitional housing in 2020 exited homelessness into permanent housing.

Veterans; Families; African American households; Veterans make up a little over 10% of the homeless population, but the majority receiving services are diagnosed with chronic health conditions, including mental illness.

Families receiving emergency housing services who are new to homelessness have a lower exit to permanent housing rate than those referred to permanent housing options.

African American households are over-represented in all areas of housing assistance, and as such prioritization should be provided to improve position outcomes in regard to housing placement.

Describe the trackable data goal(s) related to this Outcome Goal:

The CoC will accomplish the following towards this goal:

- The number of people exiting homeless into permanent housing will increase by 16%.
- The number of people exiting shelter/interim housing into permanent housing will increase by 25%.
- The number of unaccompanied youth and parenting youth (under 25) exiting homelessness into permanent housing will increase by 20%.
- The number of people experiencing behavioral health issues exiting homelessness into permanent housing will increase by 10%.

The County will complement the CoC through the following:

- Percentage of African American households exiting homelessness to permanent housing will increase by 15%.
- Reduce the length of time in shelter/interim housing and connections to permanent housing options by half.
- Double current housing search services and activities.

4. Reducing the length of time persons remain homeless.

4. Reducing the length of time persons remain homeless.

Goal Statement

By the end of the performance period, HDIS data for San Bernardino County and the City and County of San Bernardino CoC will show 106 days as the average length of time that persons are enrolled in street outreach, emergency shelter, transitional housing, safe haven projects and time prior to move-in for persons enrolled in rapid rehousing and permanent housing programs annually, representing 35 fewer days and a 25% reduction from the baseline.

Goal Narrative

Currently, individuals and families on average wait nearly 5 months to be connected to a permanent housing program. Improving CES and available housing options through better data management and faster enrollment services, the County and CoC will reduce the wait time for housing placement by over a month. This will result in families moving into permanent housing at a faster rate, helping to reduce the numbers of individuals and families seeking housing. Housing navigation and placement services will be connected through CES to accomplish this goal.

Baseline Data 141	Change in # of Days 35	Change as % of Baseline -25%	Target Average length of time (in # of days) persons enrolled in street outreach, emergency shelter, transitional housing, safehaven
-----------------------------	----------------------------------	--	---

Decrease/Increase in # of Days
Decrease

Describe Your Related Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:

Households with at least 1 adult and 1 child assisted through the homeless service system in 2020 remained homeless for an average of 151 days. African American households assisted through the homeless service system in 2020 remained homeless for an average of 143 days. Latino households, although their average wait time is less at 116 days, collectively are composed of a large number of impacted individuals. People/households of multiple races assisted through the homeless service system in 2020 remained homeless for an average of 174 days. Over 75% of individuals who remain homeless the longest are considered BIPOC (Black, Indigenous, People of Color).

Describe the trackable data goal(s) related to this Outcome Goal:

The CoC will accomplish the following towards this goal:

- The average length of time persons in households with children remain homeless will be reduced by 51 days.
- The average length of time African American households remain homeless will be reduced by 43 days.

The County will complement the CoC through the following:

- Decrease the length of time from entry into by-name list to CES by 25%.

The CoC and County collectively will accomplish the following goal:

- The average length of time that all BIPOC households remain homeless will be reduced by 25% from entry into CES to appropriate service connections.

5. Reducing the number of persons who return to homelessness within two years after exiting homelessness to permanent housing.

5. Reducing the number of persons who return to homelessness within two years after exiting homelessness to permanent housing.

Goal Statement

By the end of the performance period, HDIS data for San Bernardino County and the City and County of San Bernardino CoC will show 2% of people return to homelessness within 2 years after having exited homelessness to permanent housing, representing 190 fewer people and a 2% reduction or increase from the baseline.

Goal Narrative

Baseline data shows 2,407 individuals entering into permanent housing each year. San Bernardino County/CoC recidivism rates show about 4% of successful housing exits return to homelessness within 2

years. The goal of the region is to reduce the 3-year recidivism rate by 2%. This will account for a 2% decrease within 2 years reflecting 48 fewer people exiting back into the streets and maintaining their housing.

Baseline Data	Change in % of People	Change as % of Baseline	Target % of people who return to homelessness within 2 years after having exited homelessness to permanent housing
4%	2%	-50%	2%

Decrease/Increase in # of People
Decrease

Describe Your Related Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:

According to the landscape analysis provided, unaccompanied youth and parenting youth have a higher percentage of returns to homelessness within 6 months (14% and 10% respectfully) compared to all other groups in 2020. Also, the landscape analysis identified many BIPOC households with double digit percentage returns to homelessness within 6 months. In addition, 11% of persons experiencing severe mental illness and persons experiencing substance abuse disorder returned to homelessness within 6 months. And 10% of Veterans and persons fleeing domestic violence returned to homelessness within 6 months.

Describe the trackable data goal(s) related to this Outcome Goal:

The CoC and County collectively will accomplish the following goal:

- The percentage of transitional aged youth (18-25) who return to homelessness after exiting to permanent housing will be reduced by 25%.
- The percentage of BIPOC households who return to homelessness after exiting to permanent housing will be reduced by 25%.
- The percentage of persons experiencing severe mental illness and persons experiencing substance abuse disorder who return to homelessness after exiting to permanent housing will be reduced by 25%.
- The percentage of Veterans and persons fleeing domestic violence who return to homelessness after exiting to permanent housing will be reduced by 25%.

6. Increasing successful placements from street outreach.

6. Increasing successful placements from street outreach.

Goal Statement

By the end of the performance period, HDIS data for San Bernardino County and the City and County of San Bernardino CoC will show 414 total people served in street outreach projects exit to emergency shelter, safe haven, transitional housing, or permanent housing destinations annually, representing 207 more people and a 100% increase from the baseline.

Goal Narrative

San Bernardino County and the CoC are investing millions in state and federal funding to address street homelessness. The region currently has multiple teams funded to provide street outreach and engagement to reduce the numbers of unsheltered homeless.

Describe Your Related Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:

San Bernardino County and the CoC are investing millions in state and federal funding to address street homelessness. The region currently has multiple teams funded to provide street outreach and engagement to reduce the numbers of unsheltered homeless.

Describe the trackable data goal(s) related to this Outcome Goal:

The CoC will accomplish the following towards this goal:

- 100 high utilizers of services will be successfully placed from street outreach to a permanent housing destination.
- The number of people successfully placed from street outreach to a sheltered or permanent housing destination will increase by 25%.
- The number of chronically homeless people successfully placed from street outreach to a sheltered and/or permanent housing location will increase by 25%.

The County will complement the CoC through the following:

- In one year, 100 unsheltered high utilizers of services will exit homelessness, with 65% entering into stable housing and 35% connected to services to support housing and safety.

The CoC and County collectively will accomplish the following goal:

- The number of women and girls successfully placed from street outreach to a sheltered or permanent housing location will increase by 25%.
- The number of BIPOC households successfully placed from street outreach to a sheltered or permanent housing location will increase by 25%.

Table 5: Strategies to Achieve Outcome Goals

Strategy 1

Type of Strategy

Strategic uses of other sources of funding

Description

Facilitate innovative housing solutions focusing on smaller scale projects using alternative typologies (such as tiny homes, accessory dwelling units and shared living environments) and alternative housing production delivery methods (such as prefab manufactured, shipping container and 3-D printed housing units), as well as public-private partnerships and innovative financing, to create at least 300 new units of permanent supportive and/or service-enriched affordable housing.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

Continuum of Care ICH Housing Committee

Measurable Targets

At least 300 new units of permanent supportive and/or service-enriched housing will be occupied by June 2025.

Performance Measure(s) to Be Impacted (Check all that apply)

- 1. Reducing the number of persons experiencing homelessness.
- 3. Increasing the number of people exiting homelessness into permanent housing.
- 4. Reducing the length of time persons remain homeless.
- 5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.
- 6. Increasing successful placements from street outreach
- 7. Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy 2

Type of Strategy

Strengthening the quality or performance of housing and/or services programs

Description

Expand funding resources committed to rapid rehousing programs implemented through a coordinated, standardized, systematic approach as outlined in the SBCHP Rapid Re-Housing Program Standards, Practices & Model Guidelines to increase the number of people/households achieving successful exits into permanent housing stability.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

Continuum of Care Lead Agency and designated CES lead

Measurable Targets

Continuum of Care Lead Agency and designated CES lead

Performance Measure(s) to Be Impacted (Check all that apply)

- 1. Reducing the number of persons experiencing homelessness.
- 3. Increasing the number of people exiting homelessness into permanent housing.
- 4. Reducing the length of time persons remain homeless.
- 6. Increasing successful placements from street outreach
- 7. Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy 3

Type of Strategy

Increasing investments into, or otherwise scaling up, specific interventions or program types

Description

Expand the pool of CoC system-engaged, year-round shelter beds and interim housing units using a combination of facility-based programs, voucher-based programs and other innovative approaches and

focus a greater percentage of resources on successful shelter exits to permanent housing.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

July 2022 - June 2025

Measurable Targets

Continuum of Care Lead Agency and designated CES lead

Performance Measure(s) to Be Impacted (Check all that apply)

- 3. Increasing the number of people exiting homelessness into permanent housing.
- 4. Reducing the length of time persons remain homeless.
- 6. Increasing successful placements from street outreach
- 7. Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy 4

Type of Strategy

Strategic uses of other sources of funding

Description

Establish a coordinated, collaborative, multi-source flexible funding pool along with system-wide standards and practices to facilitate targeted homeless diversion and prevention strategies to reduce the number of people and households that become homeless for the first time by 15% annually.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

Continuum of Care Lead Agency and designated CES lead

Measurable Targets

At least 300 households living housing insecure and/or at-risk of homelessness will be prevented from becoming literally homeless through systemwide diversion and prevention strategies and practices.

Performance Measure(s) to Be Impacted (Check all that apply)

- 1. Reducing the number of persons experiencing homelessness.
- 2. Reducing the number of persons who become homeless for the first time.
- 5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.

Strategy 5

Type of Strategy

Strategic uses of other sources of funding

Description

Establish a multi-source flexible funding pool to implement a comprehensive, coordinated, countywide eviction prevention program prioritizing households with income at/or below 80% AMI.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

Continuum of Care CES

Measurable Targets

At least 375 households at imminent risk of homelessness will be prevented from becoming homeless through eviction prevention strategies.

Performance Measure(s) to Be Impacted (Check all that apply)

1. Reducing the number of persons experiencing homelessness.
2. Reducing the number of persons who become homeless for the first time.
5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.
7. Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy 6

Type of Strategy

Strengthening systemic efforts and processes, such as coordinated entry and assessment processes, landlord engagement efforts, housing navigation strategies, and other systemic improvements

Description

Establish a Coordinated Outreach Resources & Engagement (CORE) system to facilitate coordinated and collaborative street outreach activities which shall include the targeting of resources to "high utilizers of safety net services" and other persons experiencing chronic and/or long-term homelessness to provide a concentrated-level of services and activities to facilitate successful placements from street outreach leading to permanent housing.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

San Bernardino County HOPE Team

Measurable Targets

At least 100 high utilizers of safety net services and experiencing chronic homelessness will achieve permanent housing stability by January 2025.

Performance Measure(s) to Be Impacted (Check all that apply)

3. Increasing the number of people exiting homelessness into permanent housing.
4. Reducing the length of time persons remain homeless.
6. Increasing successful placements from street outreach
7. Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy 7

Type of Strategy

Reaching underserved and historically marginalized

communities and populations

Description

Housing the most at-risk. Working collectively to offer an array of wraparound services to get individuals the support they need to stabilize, begin healing, and exit homelessness in less restrictive, community-based care settings will help individuals transition from homeless to home. This may also require implementing policies that look at upstream prevention and early intervention. This includes aligning the County's network of housing and homeless services continuum of care to maximize the number of persons to be served, with a focus on equitable access. By working together to provide pathways to housing, health, and income stabilization, individuals experiencing homelessness can find their unique roadmap to recovery and self-sufficiency to prevent unnecessary incarcerations and hospitalizations.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

San Bernardino County Community Revitalization and Office of Homeless Services

Measurable Targets

100 unsheltered high utilizers of services will exit homelessness each year, resulting in 300 homeless exits by 2025.

Performance Measure(s) to Be Impacted (Check all that apply)

1. Reducing the number of persons experiencing homelessness.
3. Increasing the number of people exiting homelessness into permanent housing.
5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.
6. Increasing successful placements from street outreach
7. Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy 8

Type of Strategy

Strengthening the quality or performance of housing and/or services programs

Description

Increasing shelter capacity. The County will build new partnerships with municipalities and the County's unincorporated areas to host emergency/transitional shelters with access to supportive services. This will be accomplished through the development of programs that improve community safety, test innovative low-barrier shelter solutions, and increase partnerships. Reducing barriers to shelter, such as allowing pets, storage of personal items, greater privacy, allowing access to service delivery partners, and longer and more flexible stays will help to create more low-barrier shelters.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

San Bernardino County Community Revitalization and Office of Homeless Services

Measurable Targets

Increase shelter bed capacity by 100 beds per year (total 300 beds).

Performance Measure(s) to Be Impacted (Check all that apply)

- 1. Reducing the number of persons experiencing homelessness.
- 4. Reducing the length of time persons remain homeless.

Strategy 9

Type of Strategy

Improving data quality, data systems, and/or data analyses to better inform decision-making

Description

Implementing an integrated approach to solving local unsheltered and sheltered homelessness by weaving together all outreach and engagement activities and data through Esri's ArcGIS (Geographic Information Systems) software for mapping and data visualization, and location services.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

San Bernardino County Community Revitalization and Office of Homeless Services

Measurable Targets

Will conduct 56 case conference meetings per year to identify and recommend the most appropriate intervention.

Performance Measure(s) to Be Impacted (Check all that apply)

- 3. Increasing the number of people exiting homelessness into permanent housing.
- 4. Reducing the length of time persons remain homeless.
- 6. Increasing successful placements from street outreach
- 7. Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy 10

Type of Strategy

Expanding and strengthening cross-system partnerships and/or collaborative planning

Description

Implement system improvement and capacity building activities to facilitate greater system coordination, collaboration, resource alignment and performance outcomes to include but not limited to comprehensive systemwide workforce development activities, system supports to maintain homeless services & housing delivery system, and commitment to address racial disproportionality and equitable provision of services and outcomes.

Timeframe

July 2022 - June 2025

Entities with Lead Responsibilities

San Bernardino County Community Revitalization and Office of Homeless Services

Measurable Targets

Reducing the length of time from entry into a CES by-name list by 25%.

Performance Measure(s) to Be Impacted (Check all that apply)

4. Reducing the length of time persons remain homeless.

7. Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

*Click + **Add Strategy** above to add additional strategies as needed.*

Part III. Narrative Responses

Copy and paste your responses to Part III. Narrative Responses from the [HHAP-4 Local Homelessness Action Plan & Application Template](#) into the form below.

Question 1

[50220.8(b)(3)(D)] My jurisdiction (e.g., City, County, CoC) collaborated with other overlapping jurisdictions to develop the strategies and goals related to HHAP-4

Q1

Yes

Question 2

[50220.8(b)(3)(D)] My jurisdiction (e.g., City, County, CoC) consulted with each of the following entities to determine how HHAP-4 funds would be used:

Public agencies (governmental entities)

Yes

Private sector partners (philanthropy, local businesses, CBOs, etc.)

Yes

Service providers (direct service providers, outreach, shelter providers, etc.)

Yes

Local governing boards

Yes

People with lived experience

Yes

Other

No

a. Please describe your most notable coordination and collaborative processes with these entities.

The Office of Homeless Services (OHS) is an office under the County's Community Revitalization section, which is the lead agency identified by the County to administer both the County's portion of HHAP funding and the Continuum of Care's (CoC). As such, it is the responsibility of the OHS to actively coordinate and establish collaborative efforts with all agencies providing homeless-related services throughout the region. The current CoC governing board is made up of representatives from the County, local cities, nonprofits, a person with lived experience, the county's local education agency, and the main region's housing authority, to coordinate and share resources with the CoC. Annually, the OHS engages all members of the CoC and other county agencies in a series of multi-jurisdictional online workshops and/or committees designed to address the specific needs of the various regions throughout the county and to receive their input in the planning/development process. Members of the CoC, which include homeless service providers, nonprofit organizations, faith-based organizations, homeless advocates, current and formerly homeless, city, county, state and federal agencies meet regularly with other providers in their regions to review all data available to make data informed decisions for funding prioritization based on regional needs. In the past, the CoC and the County have received almost similar amounts respectfully. The CoC has allocated almost all the funding to support regional efforts primarily focused on supportive services, temporary shelter, bridge

housing and rental assistance. The County complemented those actions by focusing on longer-term solutions as noted within the County recently adopted Homeless Strategic Action Plan (HSAP). The HSAP was developed with input from over 500 key stakeholders including nonprofits, faith-based organizations, developers, healthcare providers, people with lived experience, Veterans, seniors, youth, municipalities, the 5 service planning areas of the CoC, County departments, Caltrans, homeless advocates, and members of the various communities throughout the county. The allocation of these funds in this manner will allow for the HHAP resources to be invested in the full spectrum of addressing homelessness.

Question 3

[50220.8(b)(3)(B) and 50220.8(b)(3)(E)] My jurisdiction (e.g., City, County, CoC) is partnering or plans to use any round of HHAP funding to increase partnership with:

People with lived experience

Yes

Is this partnership formal or informal?

Informal partnering

Is this partnership current or planned?

Current

Do HHAP Funds Support This Partnership?

No

Social services (CalFresh, Medi-cal, CalWORKs, SSI, VA Benefits, etc.)

Yes

Is this partnership formal or informal?

Formal partnering

Is this partnership current or planned?

No

Local Homeless Coordinated Entry System

Yes

Is this partnership formal or informal?

Formal partnering

Is this partnership current or planned?

Current

Do HHAP Funds Support This Partnership?

No

Other (please specify)

No

a. Please describe your most notable partnership with these groups (e.g. MOUs, shared funding, data sharing agreements, service coordination, etc.)

The Office of Homeless Services (OHS) has been partnering with the Homeless Veterans Community Planning Group (HVCPG) since 2015. On July 21, 2015, the San Bernardino County Board of Supervisors convened a Special Study Session on homelessness during which they voted unanimously (4-0) to implement a new strategy to end veterans' homelessness in the county. This commitment included a comprehensive and coordinated approach to place the county's 401 identified homeless veterans into permanent housing by the end of 2015.

The commitment involved the Homeless Veterans Community Planning Group (HVCPG), which formed in November 2014, at the VA Medical Center in Loma Linda to address the task of ending veteran's homelessness in San Bernardino County. In conjunction with the planning group, the OHS would assist to maintain a Master List to keep track of the scope of the homeless veteran problem in the county; the HVCPD would establish benchmarks to accomplish its mission; and identify the resources needed to accomplish the mission of ending veterans homeless in San Bernardino County.

In order to address the Initiative, a comprehensive strategy and partnership between multiple agencies was formed. This Partnership included a variety of members from the Homeless Provider Network, which represents the membership of the Continuum of Care (CoC), local government agencies (i.e., county and city governments), Veteran service provider agencies, the Veterans Affairs (VA) Loma Linda Healthcare System, the San Bernardino County VA Office and benefit assistance, the Housing Authority of the County of San Bernardino (HACSB), the local coordinated entry system (CES), members of the private sector and faith-based communities, the Sheriff's Homeless Outreach and Proactive Enforcement (HOPE) Team, and Veteran housing advocates. These members established a sharing protocol, which included a release of information protocol to share data regarding homeless Veterans who were being assisted by the various agencies to connect them with appropriate housing.

Since the beginning of the Initiative, the HVCPG, OHS, VA Loma Linda, County VA, the HACSB, CES, and the CoC, have been meeting weekly to review the status of the active Veterans receiving case management support and housing support services. To date this partnership has housed nearly 2,000 Veterans' households. The HACSB has secured 629 Veterans Affairs Supportive Housing (VASH) vouchers for the region, and our Supportive Services for Veterans and Families (SSVF) have secured millions in funding for our joint endeavor.

Another partnership between OHS that has added to the robust nature of services throughout the county is

through its partnership with the Sheriff's HOPE Team. The HOPE Team serves as a crucial component of the CES and is the primary street outreach team the local CoC and County relies on. The HOPE Team has established a geographic information system (GIS) using ESRI global mapping technology. This system is overlaid with data the OHS uses to capture point-in-time county (PITC) homeless survey data. OHS has entered into a memorandum of understanding with the Sheriff to capture this data and allow access to the HOPE Team of the Homeless Management Information System (HMIS) data and ultimately CES information.

The HOPE Team and through its Sheriff partners, assesses unsheltered individuals encountered in the streets to connect them with essential resources using CES and HMIS. This has resulted in a robust accounting of homeless individuals through a near weekly census. Data is capture and shared and the HOPE Team and OHS can see trends in homelessness and movement throughout the county utilizing this system. As a result of the success using ESRI, the CoC has opted to switch its HMIS software provider to BitFocus/Clarity which is based on an ESRI platform.

Question 4

[50220.8(b)(3)(B) and 50220.8(b)(3)(E)] My jurisdiction (e.g., City, County, CoC) is strengthening its **partnership, strategies, and resources** across:

Managed care plans and resources (such as the Housing and Homelessness Incentive Program [HHIP])

Yes

Physical and behavioral health care systems and resources

Yes

Public health system and resources

Yes

a. Please describe your most notable coordination, planning, and/or sharing of data/information that is occurring within these partnerships.

Beginning in 2018, the OHS had initiated collaboration with the CoC Standing Health Committee to see how it could connect resources to the various local healthcare providers and managed care plans. This resulted in allowing health agencies to have read-only access to the HMIS, so health employed social workers and case managers would be able to see if homeless patients had or are currently receiving supportive services through agencies participating as part of the HMIS. In order to access the data, each agency seeking access entered into a memorandum of understanding with the OHS.

This also allowed greater expansion to the original whole person care stratagem to overlay health and homeless resources. OHS later participated with the local managed care organizations to implement California Advancing and Innovating Medi-Cal (Cal AIM) efforts through enhance case management community supports in partnership with the local Department of Behavioral Health.

More recently, the OHS through its Community Revitalization group has engaged in discussion with the two local Medi-Cal managed care plans, Inland Empire Health Plan (IEHP) and Molina Healthcare, have been coordinating how the Homeless Housing, Incentive Program (HHIP) and the Homeless Housing, Assistance and Prevention (HHAP) program can complement each other to enhance and combine health and homeless care resources.

IEHP and Molina Healthcare participated in a collaborative effort to reduce and prevent homelessness in San Bernardino County while also ensuring Medi-Cal members have access to housing services. Both agencies engaged representatives of the County and CoC for development and input for their Housing and Homelessness Incentive Program (HHIP) County Local Homelessness Plans which were derived to align efforts with the local CoC and County in their joint homeless action planning efforts. Both health plans are resolved to address identified housing and service gaps in alignment with San Bernardino County's Homelessness Action Plan and the Homeless Housing, Assistance and Prevention (HHAP) Grant Program

by ensuring that health plans have the necessary capacity and partnerships to connect Members to needed housing services. IEHP, Molina, the CoC and County will work together on an approach that focuses on the following:

- Develop partnerships between MCPs and social service agencies, counties, public health agencies, and public and community-based housing agencies to address homelessness
- Provide rapid rehousing for Medi-Cal families and youth, and interim housing for aging and disabled populations
- Expand access to housing services and street medicine programs
- Improve access to coordinated housing, health, and other social services
- Reduce avoidable use of costly health care services
- Improve whole person health for Medi-Cal enrollees, including behavioral health treatment and resources
- Implement solutions that manage information to better identify populations of focus and Member needs

Discussions have already begun in terms of investing HHIP resources to improve the overall homeless services system within the region to enhance positive health and homeless joint outcomes.

Question 5

[50220.8(b)(3)(F)] Please select what actions your jurisdiction will take to ensure racial/ethnic/gender groups that are overrepresented among residents experiencing homelessness have equitable access to housing and services:

[50220.8(b)(3)(F)] Please select what actions your jurisdiction will take to ensure racial/ethnic/gender groups that are overrepresented among residents experiencing homelessness have equitable access to housing and services:

Disaggregating administrative data for use in decision making processes

Modifying procurement processes

Ensuring those with lived experience have a role in program design, strategy development, and oversight

Developing workgroups and hosting training related to advancing equity

a. Please describe the most notable specific actions the jurisdiction will take regarding equity for racial/ethnic/gender groups.

The CoC actively recruits persons with lived experience, specifically communities of color and LGBTQ+ to participate in policy, program, and funding decisions at the annual Homeless Summit, Project Connect Outreach events, and during the PITC volunteer recruitment. As a result of the active recruitment there are 10 persons with lived experience that provide input into the local planning process and recommend revisions to local policies addressing homelessness related to coordinated entry, services, and housing. The CoC recently created an ad hoc committee to review historical data to analyze and create strategies to address racial disparities within the region based on aggregate data from the Racial Equity Analysis Tool (REAT) and California's Homeless Data Integration Systems (HDIS), The U.S. Census Bureau American Community Survey (ACS); Point-in-Time Homeless Unsheltered and Sheltered Count (PIT Count); Coordinated Entry System (CES); and Homeless Management Information System (HMIS). The San Bernardino County CoC analyzed the information looking for racial disparities which revealed two significant racial/ethnicity disparities when the data sources are used to determine "overrepresentation: by comparing the data sources for race and ethnic groups. The data revealed the following:

1. Black/African Americans are disproportionately represented in the homeless population compared to their representation in the general population. Black/African Americans made up 8% of the general population and 12% of persons living in poverty in San Bernardino in 2019. Blacks/African Americans, however, made up 24% of the total number of persons counted during the 2020 homeless count and 21% of the total number of persons counted as unsheltered (living on the streets, in makeshift shelters (i.e., tents, tarps, and/or boxes) and 32% of the total number of persons counted as sheltered, which includes staying in an emergency shelter, transitional housing and non-congregate shelter such as a hotel/motel

room paid by a charitable entity.

2. More than 52% of the general population of Hispanics or Latinos was living in poverty, whereas nearly 31% of homeless persons entered in to CES were Hispanics or Latinos and approximately 35% of homeless persons entered into HMIS were Hispanics or Latinos and approximately 36% of homeless persons who exited to permanent housing after being entered into HMIS were Hispanics.

The County and the CoC will seek to recommend and implement the following actions in regards to racial equity: 1) enhance service delivery, specific to communities impacted by gender, with program services designs created to include gender-specific delivery of services, 2) housing placement activities which will focus on single parent, elderly, LGBTQ+ people, particularly those at the very lowest income limits with these often disenfranchised groups being prioritized for future housing investments made by the state and federal governments, and 3) support housing retention rates by ensuring housing policies are created utilizing a gender lens and design housing with gender-related development in mind and incorporating a gender-responsible inclusiveness for County and CoC planning purposes, identifying the unique challenges faced by women and LGBTQ+ people of lived experience, especially among the BIPOC community.

In addition, the County OHS works with the CoC to include formerly homeless individuals in discussion and policy-making activities. In 2022, the CoC created the Homeless Strategic Action Plan to focus on strategic and continuous improvement to prevent and reduce homelessness and included input about policies and best practices from formerly homeless persons. This included input from a person with former lived experience, a former homeless youth with lived experience, and a former homeless Veteran with lived experience.

The CoC Board and OHS staff regularly coordinates advisory committees and invite homeless and formerly homeless to participate in homeless planning meetings to determine, funding criteria, funding scoring criteria, policy updates and policy making. Persons with lived experience sit on almost every CoC-related homeless committee, including those that make decisions about program implementation and system-wide policies. Persons with lived experience have worked with the County and the CoC to adopt policies and operations, promote affordable housing solutions, and recommend best practices on engaging people with lived experience. CoC efforts to engage persons with lived experience of homelessness include announcements during the CoC Board and committee meetings.

Question 6

[50220.8(b)(3)(G)] My jurisdiction (e.g., City, County, CoC) has specific strategies to prevent exits to homelessness from **institutional settings** in partnership with the following mainstream systems:

Physical and behavioral health care systems and managed care plan organizations

Yes, informal partnering

Public health system

Yes, informal partnering

Criminal legal system and system for supporting re-entry from incarceration

Yes, informal partnering

Child welfare system

Yes, informal partnering

Affordable housing funders and providers

Yes, informal partnering

Income support programs

Yes, informal partnering

Education system

Yes, informal partnering

Workforce and employment systems

Yes, informal partnering

Other (please specify)

No

a. Please describe the most notable specific actions the jurisdiction will take to prevent exits to homelessness from institutional settings

Both the County and the CoC have recommended discharge policies for institutions that are at higher risk of discharging individuals into homelessness upon release from the facility.

Traditionally, these discharge policies are associated with foster care services, correctional facilities or through juvenile probation clients, mental health institutions, hospitals and healthcare providers, treatment centers, and potential military organizations.

All of these agencies are required to take specific steps to connect discharged clients with resources that will support the long-term care to help these individuals into housing, housing maintenance, and prevent homeless recidivism. The County and CoC will explore strengthening current policies to help prevent returns into homelessness. Some of the recommendations will include:

- High-level wrap around support, access to mainstream services (i.e., SSI/SSDI), and case management for all individuals exited from institutions as coordinated with the local coordinated entry system (CES).
- Referral to CES from all institutional settings.
- Provide ongoing educational transition meetings to the various settings several times a year at least six months in advance to discharge to allow preparation and potential connections to housing opportunities prior to discharge.
- Provide regular trainings for institutional settings that discharge clients, especially among staff.
- Improve the assessment instrumentation currently used to help improve placements.
- Coordinate collection of data regarding exit destinations for discharged individuals.

The OHS routinely asks for updated discharge policies from institutional settings for review by the CoC for recommendations to improve planning and eventual discharge for clients.

Question 7

[50220.8(b)(3)(H)] Specific and quantifiable **systems improvements** that the applicant will take to improve the delivery of housing and services to people experiencing homelessness or at risk of homelessness, including, but not limited to, the following:

(I) Capacity building and workforce development for service providers within the jurisdiction, including removing barriers to contracting with culturally specific service providers and building the capacity of providers to administer culturally specific services.

The CoC as well as the County will be focused on a number of systems improvement activities to improve the delivery of services, strengthen provider's capacity to engage in services, and improve the foundation of the CoC, the County and its collaborative structure. The CoC was allocated \$780,374.96 and the County was allocated \$728,349.96. The CoC has voted to allocate the funding for 1) capacity building and workforce development for system service providers. This will be in the form of a series of structured education and training activities to include: racial, gender, ethnic equity and cultural competency training, best practices for service delivery and activities, organizational capacity building, fund development, and governmental contract compliance, 2) a commitment to address racial disproportionality in homeless populations through the achievement of equitable provision of services and outcomes to include: a comprehensive evaluation of racial, ethnic, and gender disproportionality and cultural biases in accessing resources and services within the countywide homeless service system, and facilitating system

improvements to help achieve equitable services and outcomes; 3) systems support for activities necessary to create regional partnerships and maintain a homeless services and housing delivery system to include: regional planning activities linked to systemwide coordination and service delivery improvements within each region and the region as a whole, and developing recommendations to facilitate improvements to intra-system and cross-system data collection, analysis, and resource alignment; and 4) youth set aside funding to improve youth action board involvement and developing a specific youth CES component. The County will seek to compliment activities conducted through the CoC.

(II) Strengthening the data quality of the recipient's Homeless Management Information System.

The OHS as the HMIS provider for the County and CoC has switched its HMIS provider from Eccovia to Bit Focus/Clarity. The new provider's platform is based on Environmental Systems Research Institute (ESRI) geographic information system (GIS) technology. ESRI is located in the city of Redlands, located within the County of San Bernardino, and as such the County has access to the platinum package of software through ESRI. The County and CoC will be able to cross reference various data sources utilized under ESRI to improve the collection of data and cross reference multiple data platforms currently not available under our current HMIS provider. This will allow OHS to develop a platform for increased data and information sharing with other software platforms such as, health care management, behavioral health and public health systems, sheriff data and law enforcement data to improve information and strengthen our local HMIS. The purpose is to be able to share information across systems, while being sensitive to data restrictions such as the Health Insurance Portability and Accountability Act (HIPAA) and personally identifiable information (PII).

(III) Increasing capacity for pooling and aligning housing and services funding from existing, mainstream, and new funding.

The Local Homelessness Action Plan has provided a platform for the County and CoC to take an accountability of all homeless and housing related funding. The inventory of program, funding, and resources will allow the region to align and leverage services to maximize housing and homeless services utility within the region, while avoiding and discouraging supplantation of services. Case conferencing and other services will be available through the new HMIS software, and within the next few months, OHS will begin an aggressive training to providers and agencies interested in understanding the data. The CES will be accessed through Clarity so all applicable agencies and referrals maintained in the system will be accessible to the region through the platform.

(IV) Improving homeless point-in-time counts.

The CoC currently utilizes a survey-based methodology to conduct the Point-In-Time Count (PITC). All 24 incorporated cities in the county conduct their own count, with the County and CoC facilitating the process. OHS uses ESRI technology to capture the data in real time and GIS map the information for trend analysis. OHS was among the first to use ESRI technology to complete the PITC and was awarded a National Association of Counties (NaCo) award for its work in improving the collection of PITC data and ability to cross-reference this information with a vast variety of other data sets.

(V) Improving coordinated entry systems to strengthen coordinated entry systems to eliminate racial bias, to create a youth-specific coordinated entry system or youth-specific coordinated entry access points, or to improve the coordinated entry assessment tool to ensure that it contemplates the specific needs of youth experiencing homelessness.

Through the significant number of resources being made to the local jurisdiction, many more agencies and programs have been funded to provide homeless services over the past year, all with requirements to coordinate with CES. All of these agencies have to be trained in the CES protocols and how to enter data and upload documents into the CES workflow within HMIS. This also strains the capacity of CES to meet with HUD required mandates.

The CoC has engaged the HUB for Urban Initiatives to complete an annual assessment of the CES. For the past several months, our consultant Dr. Patricia Leslie, has been meeting regularly with members of the County, CoC, and the local CES provider to review the HUD mandated services a CES should provide.

This is also based upon a review of the CES conducted a couple of year back with certain recommendations provided to Inland SoCal United Way 211+ (the HUD funded CES provider). The CoC has also been receiving guidance and direction from HUD technical assistance to help strengthen our local CES. A consumer survey was completed and analyzed for improvements. The CoC and the County will be utilizing the initial disbursement award to address racial inequities within assessment tools used to prioritize services. An evaluation of the data provided by the State shows a clear difference in the length of time BIPOC communities must wait to enter into housing from their White counterparts. The County has adopted strategies to improve performance measures through the CES including outcome goals identifying improvements in the length of time from entry into a by-name list and improvements in the length of time from entry into the CES to appropriate service connections and appropriate temporary and/or permanent housing options. This will all be improved through an equity lens, noting the various demographics of individuals and families being assisted, an analysis of the data, and process reviews conducted to continuously improve services.

Question 8

***Responses to these questions are for informational purposes only.**

What **information, guidance, technical assistance, training, and/or alignment of resources and programs** should Cal ICH and other State Agencies prioritize to support jurisdictions in progressing towards their Outcome Goals, Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness, and/or would otherwise help strengthen local partnerships, coordination, planning, and progress toward preventing and ending homelessness?

Information, Guidance, and Technical Assistance

Facilitation of planning processes and collaborative approaches among cross-agency and community-level partners

Technical assistance on implementing performance-based contracting

Trainings on topics of equity

Alignment of Resources and Programs

In the space below, please describe what Cal ICH and other State Agencies should prioritize related to alignment of resources and programs, strengthening partnerships and collaborations, or any other ways that State can support communities' progress:

Untitled

The Southern California Continuums of Care participate as part of a regional alliance sponsored through Dr. Joe Colletti of Urban Initiatives. Such meetings may also be beneficial to Central and Northern California CoCs. I would recommend establishing regional alliances as they have been useful to Southern California CoC relations and communication.

Part IV. Funding Plan Strategic Intent Narrative

Question 1

Eligible Use 1

Eligible Use Category Intended to be Supported with HHAP-4

1. Rapid rehousing

Approximate % of TOTAL HHAP-4 ALLOCATION to be used on this Eligible Use(%)

30.00%

Approximate % of TOTAL HHAP-4 ALLOCATION to be used under this Eligible Use as part of the Youth Set Aside? (%)

5.00%

Activities to be Supported with HHAP-4

Targeted Rapid Rehousing projects and supportive services

How is this a strategic use of HHAP-4 resources that will address needs and gaps within the homelessness response system?

Rapid rehousing (RRH) is an inexpensive and effective solution to move individuals and families who have fallen into homelessness into housing at a faster pace. Much of the funding received by the County and CoC is to provide permanent supportive housing (PSH) assistance. RRH assistance will complement funding already provided to the area.

How were these decisions to invest HHAP-4 into these activities informed by the planned uses of other state, local, and/or federal funding sources (as documented in the Landscape Analysis in Part I)?

Rapid rehousing (RRH) has been proven an effective tool in moving individuals and families back into permanent housing. During ARRA, under the Obama Administration, rapid rehousing was over 80% effective for placement. In addition, the San Bernardino County CoC recently conducted a cost analysis study showing the average cost to permanently house a family through RRH was approximately \$5,000 per family per year.

Eligible Use 2

Eligible Use Category Intended to be Supported with HHAP-4

2. Operating subsidies

Approximate % of TOTAL HHAP-4 ALLOCATION to be used on this Eligible Use(%)

15.00%

Approximate % of TOTAL HHAP-4 ALLOCATION to be used under this Eligible Use as part of the Youth Set Aside? (%)

2.00%

Activities to be Supported with HHAP-4

Capitalized operating support reserves to support housing programs that do not offer case management and operational cost for maintenance of units

How is this a strategic use of HHAP-4 resources that will address needs and gaps within the homelessness response system?

Many recent housing programs for development of PSH need ongoing capitalized operating subsidy reserves to make these long-term programs viable and enticing for developers to participate with local

government and the CoC. These commitments will allow programs more time to help locate additional funding for longer-term stability.

How were these decisions to invest HHAP-4 into these activities informed by the planned uses of other state, local, and/or federal funding sources (as documented in the Landscape Analysis in Part I)?

As a result of successful Homekey projects funded within the region, the long-term viability of these projects has focused the region to be proactive in investing funding to maintain PSH programs for longer periods, while providing funding that may be used in emergency situations to augment existing funds through supplementation.

Eligible Use 3

Eligible Use Category Intended to be Supported with HHAP-4

3. Street outreach

Approximate % of TOTAL HHAP-4 ALLOCATION to be sed on this Eligible Use(%)

8.00%

Activities to be Supported with HHAP-4

Street engagement and connection to resources through the CES and temporary shelter.

How is this a strategic use of HHAP-4 resources that will address needs and gaps within the homelessness response system?

Literally homeless individuals either lack the knowledge to effectively access mainstream and housing resources or choose to avoid such services due to ongoing distrust in the system. Street Outreach is needed to provide the resources and education needed for the homeless community, and to establish rapport with homeless individuals and families.

How were these decisions to invest HHAP-4 into these activities informed by the planned uses of other state, local, and/or federal funding sources (as documented in the Landscape Analysis in Part I)?

San Bernardino County has been investing in a number of street outreach programs in collaboration with the local CoC. So far, these programs have proven to be effective in reducing the number of individuals in known encampments and increasing access to available resources. Services such as this will reduce street homelessness.

Eligible Use 4

Eligible Use Category Intended to be Supported with HHAP-4

6. Delivery of permanent housing

Approximate % of TOTAL HHAP-4 ALLOCATION to be sed on this Eligible Use(%)

25.00%

Approximate % of TOTAL HHAP-4 ALLOCATION to be used under this Eligible Use as part of the Youth Set Aside? (%)

3.00%

Activities to be Supported with HHAP-4

Innovative housing programs (such as development of PSH and PH).

How is this a strategic use of HHAP-4 resources that will address needs and gaps within the

homelessness response system?

As we have seen due to recent investments by the State of California, innovative housing development projects such as motel/hotel conversions are a fast and inexpensive way to maximize housing for the homeless. Continued development of such programs will increase housing placements significantly and will align with the Governor's proposed statewide vision.

How were these decisions to invest HHAP-4 into these activities informed by the planned uses of other state, local, and/or federal funding sources (as documented in the Landscape Analysis in Part I)?

To date thousands of units have been created through innovative investments by the State of California. HHAP funding will provide more flexibility for the region to develop similar projects which will result in long-term housing investments for the region.

Eligible Use 5

Eligible Use Category Intended to be Supported with HHAP-4

5. Systems support

Approximate % of TOTAL HHAP-4 ALLOCATION to be sed on this Eligible Use(%)

15.00%

Activities to be Supported with HHAP-4

System improvements and capacity building.

How is this a strategic use of HHAP-4 resources that will address needs and gaps within the homelessness response system?

System improvement is continually needed to address the increase in homelessness and the successful response in lowering it throughout the region. Better understanding of data will help to improve resource access and education for homeless service providers will help to secure faster connections to services.

How were these decisions to invest HHAP-4 into these activities informed by the planned uses of other state, local, and/or federal funding sources (as documented in the Landscape Analysis in Part I)?

San Bernardino County is a region where capacity building issues have long been a problem. The James Irvine Foundation has noted San Bernardino County has one of the lowest per capita funding rates throughout the State. System improvements and capacity building investments will help to secure a better system, provision of services, and homeless service provider strengthening activities for the region.

Eligible Use 6

Eligible Use Category Intended to be Supported with HHAP-4

10. Administrative (up to 7%)

Approximate % of TOTAL HHAP-4 ALLOCATION to be sed on this Eligible Use(%)

7.00%

Activities to be Supported with HHAP-4

HHAP program administration for the Administrative Entity to oversee contracts and reporting to the

State.

How is this a strategic use of HHAP-4 resources that will address needs and gaps within the homelessness response system?

The 7% of administrative costs provided to the Administrative Entity will help the agency to staff, monitor, report and process funding requests for agencies providing services.

How were these decisions to invest HHAP-4 into these activities informed by the planned uses of other state, local, and/or federal funding sources (as documented in the Landscape Analysis in Part I)?

These funds will help the Administrative Entity to oversee the funds per State requirements.

Question 2

Please describe how the planned investments of HHAP-4 resources and implementation of the activities to be supported will:

Help drive progress toward achievement of the Outcome Goals and Goals for Underserved Populations and Populations Disproportionately Impacted by Homelessness (as identified in Part II above):

Planned activities and investments will be focused on lowering rates of homelessness within the region while maximizing to the extent possible the reduction of homelessness through placement in permanent housing. It is the intent to focus on the creation of permanent housing opportunities to individuals and families in need of assistance. Over 50 percent of the funding will go to support rapid rehousing and permanent supportive housing efforts.

Help address racial inequities and other inequities in the jurisdiction's homelessness response system:

A review of the data has shown the number of black, indigenous, people of color who are affected by either covert or overt practices that result in an over representation of members of the population in comparison to the general public. These inequities will be address as per the goals and strategies noted in the updated data tables.

Be aligned with health and behavioral health care strategies and resources, including resources of local Medi-Cal managed care plans:

The County and the CoC have already partnered with the local County Department of Behavioral Health (DBH) for the provision of services. In fact, DBH is an active member of our outreach engagement teams and provide support to various programs such as Project Roomkey and Homekey. DBH and Community Revitalization are active in CalAIM activities and are currently partnering with the local Medi-Cal Managed Care Plans for leveraging HHIP funding with current and upcoming HHAP funds.

Support increased exits to permanent housing among people experiencing homelessness:

The whole purpose of these funds is to help reduce homelessness within the region through the connection of individuals and families to available housing resources. The CoC has conducted an annual audit of the Coordinated Entry System to improve placements and referrals to housing resources in the region. The County and the CoC collectively will aggressively move to meet with the local goals it have established within the submitted data tables in order to meet with the expectations of the State.

Table 4. Outcome Goals

Outcome Goal #1a: Reducing the number of persons experiencing homelessness.

Goal Statement:
By the end of the performance period, HDIS data for **San Bernardino County** and the **City and County of San Bernardino CoC** will show 10,031 total people accessing services who are experiencing homelessness annually, representing **2,025 more** people and a **25% increase** from the baseline.

Goal Narrative:
San Bernardino County and the CoC will increase outreach services and marketing of services to increase the number of individuals and families accessing services who are experiencing homelessness. This will include referrals and connections to mainstream services and an active campaign to make it easier to connect to housing related services and

Baseline Data: Annual estimate of number of people accessing services who are experiencing homelessness	Outcome Goals July 1, 2022 - June 30, 2025		
	Change in # of People	Change as % of Baseline	Target Annual Estimate of # of people accessing services who are experiencing homelessness
8,006	2025	25%	10031

Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/ or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:	Describe the trackable data goal(s) related to this Outcome Goal: <i>Note: Meeting the trackable data goals for the underserved populations is not required for eligibility for Bonus Funds.</i>
Seniors receiving services has increased year to year, both unsheltered and sheltered compared to other populations. The number of unsheltered adults over the age of 55 has increased by 135% since 2018. Since 2018, more than 1 out of 5 unsheltered individuals has been identified with life threatening/chronic health conditions. Nearly half (43.5%) of the unsheltered adults identified in the 2022 PITC have experienced homelessness for more than 12 months in the last 3 years and have disabling health conditions. African Americans are four times more likely to experience homelessness compared to individuals who identify as White.	The CoC will accomplish the following towards this goal: <ul style="list-style-type: none"> •The number of adults over the age of 55 accessing services leading to permanent housing stability will increase by 20%. •The number of adults with chronic health, physical disabilities and other disabling conditions accessing services leading to permanent housing stability will increase by 20%. The County will complement the CoC through the following: <ul style="list-style-type: none"> •Senior referrals to permanent housing options through the CES will increase by 15%. •Work with cities and other partners to increase the supply of year-round permanent shelter by 200 beds throughout the county to accommodate diverse populations. •Reduce the housing placement time for African Americans by 50%.

Outcome Goal #1b. Reducing the number of persons experiencing homelessness on a daily basis.

Goal Statement:
By the end of the performance period, data for **San Bernardino County** and the **City and County of San Bernardino CoC** will show 1,914 total people experiencing unsheltered homelessness daily, representing **475 fewer** people and a **20% reduction** from the baseline.

Goal Narrative:
Within the 3 year outcome goal timeline presented the County and the CoC anticipate an annual reduction of 158 individuals captured through the annual point-in-time count. This will result in a decline of 475 individuals counted over a 3 year time period.

Baseline Data: Daily Estimate of # of people experiencing unsheltered homelessness	Outcome Goals July 1, 2022 - June 30, 2025		
	Change in # of People	Change as % of Baseline	Target Daily Estimate of # of people experiencing unsheltered homelessness
2,389	475	-20%	1914

Underserved Populations and Populations Disproportionately Impacted by Homelessness

<p>Describe any underserved and/ or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:</p>	<p>Describe the trackable data goal(s) related to this Outcome Goal: <i>Note: Meeting the trackable data goals for the underserved populations is not required for eligibility for Bonus Funds.</i></p>
<p>The number of people experiencing unsheltered homelessness on a daily basis has increased by 66% since 2018. According to the Point-In-Time Count (PITC), 1,027 individuals identified as chronically homeless on the day of the 2022 PITC. This would be 3 chronically homeless individuals identified per week, who identify as the following: Seniors, chronic health conditions, physical disabilities, severely mentally ill re-entry pop.</p> <p>African Americans represent 8% of the population in San Bernardino County but represented 21% of the people experiencing unsheltered homelessness in 2020 and 18% in 2022. According to the Point-In-Time Count (PITC), there was an increase of 28% of shelter beds usage. Most of the increase usage was seen in families and seniors who identify as African American. One third of all individuals and families in shelter identify as Black/African American.</p> <p>The number of unsheltered adults over the age of 55 has increased by 135% since 2018. Since 2018, more than 1 out of 5 unsheltered individuals has been identified with life threatening/chronic health conditions.</p> <p>Based on the 2022 PITC, more than 1 out of 3 (37%) adults counted as unsheltered in 2022 identified having substance abuse issues and nearly 1 out of 3 (29%) identified having mental health issues.</p> <p>An additional focus needs to be on young adult and youth-centered shelter services. One third of all residents in shelter are under the age of 25 years.</p>	<p>The CoC will accomplish the following towards this goal:</p> <ul style="list-style-type: none"> •The number of African Americans experiencing unsheltered homelessness will decrease by 20%. •The number of unsheltered adults over age 55 and persons with chronic health and/or other disabling conditions experiencing homelessness on a daily basis will decrease by 20%. <p>The County will complement the CoC through the following:</p> <ul style="list-style-type: none"> •Homelessness will decrease by 10% among persons who identify as Black/African American. •Increase shelter utilization rate from 87% to 95%. •100% of shelters will be trained in trauma-informed approaches. •Increase beds occupied by 200.

Outcome Goal #2. Reducing the number of persons who become newly homeless.

Goal Statement:
 By the end of the performance period, HDIS data for **San Bernardino County** and the **City and County of San Bernardino CoC** will show 3,551 total people become newly homeless each year, representing **625 fewer** people and a **15% reduction** from the baseline.

Goal Narrative:
 This goal will focus primarily on prevention. This will require a specific focus of federal and state resources dedicated to preventative activities to reduce the number of individuals and families who enter into homelessness for the first time. Actions will be coupled with municipalities efforts and school district efforts to reduce homelessness primarily through actions to assist special target groups as noted in the trackable goals as well as keeping individuals and families housed through rental assistance, utility payments, or rental arrears.

Baseline Data: Annual Estimate of # of people who become newly homeless each year	Outcome Goals July 1, 2022 - June 30, 2025		
	Change in # of People	Change as % of Baseline	Target Annual Estimate of # of people who become newly homeless each year
4,176	625	-15%	3551

Underserved Populations and Populations Disproportionately Impacted by Homelessness

<p>Describe any underserved and/ or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:</p>	<p>Describe the trackable data goal(s) related to this Outcome Goal: <i>Note: Meeting the trackable data goals for the underserved populations is not required for eligibility for Bonus Funds.</i></p>
<p>More than half of the people assisted through the homeless service system in 2020 (53%) became homeless for the first time. 75% of the persons who became homeless for the first time in 2020 were Hispanic/Latino or African American. 54% of the people who became homeless for the first time in 2020 were in households with at least 1 adult and 1 child.</p> <p>African American households in general, African American single moms with children. African American households make up 9% of the population of San Bernardino County however, 40% of the individuals and persons in families within the Homeless Management Information System identify as Black/African American, 49% of whom became homeless for the first time. They are more than 4 times disproportionately affected by homelessness than other populations in the County. This is even more reflective in the African American single moms with children target population.</p> <p>Almost 500 people experiencing significant mental illness became homeless for the first time in 2020.</p> <p>Over 400 unaccompanied youth 24 years of age and under became homeless for the first time in 2020. This age group are at higher risk of remaining homeless if intervention is not provided during this crucial time period, with many not having substantial social capital.</p>	<p>The CoC will accomplish the following towards this goal:</p> <ul style="list-style-type: none"> •Number of families with children who become homeless for the first time will decrease by 15%. •Number of Hispanic/Latino and African American households who become homeless for the first time will decrease by 15%. •The number of transitional housing units available for transitional aged youth before they become homeless will increase by 15%. <p>The County will complement the CoC through the following:</p> <ul style="list-style-type: none"> •Increase housing placement for youth 24 years of age and under by an additional 25 placements per year. •Increase transitional housing for youth by 20 units per year. •Reduce the number of African American households who become homeless for the first time by a minimum of 25%.

Outcome Goal #3. Increasing the number of people exiting homelessness into permanent housing.

Goal Statement:

By the end of the performance period, HDIS data for **San Bernardino County** and the **City and County of San Bernardino CoC** will show 3,016 total people exiting homelessness into permanent housing annually, representing **609 more** people and a **25% increase** from the baseline.

Goal Narrative:

As a result of the increased investments by the State and Federal governments in housing development, motel/hotel conversions, and ongoing voucher assistance the County and CoC estimate the creation of a potential hundreds of housing units to be made available in the subsequent years. San Bernardino County and cities within the region have already received substantial Homekey projects and will continue applying for funding and making additional program investments in PSH and RRH through funding received.

Baseline Data: Annual Estimate of # of people exiting homelessness into permanent housing	Outcome Goals July 1, 2022 - June 30, 2025		
	Change in # of People	Change as % of Baseline	Target Annual Estimate of # of people exiting homelessness into permanent housing
2,407	609	25%	3016

Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/ or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:	Describe the trackable data goal(s) related to this Outcome Goal: <i>Note: Meeting the trackable data goals for the underserved populations is not required for eligibility for Bonus Funds.</i>
<p>Only one-third (34%) of all persons assisted through the homeless service system in 2020 exited homelessness into permanent housing. Only 1 out of 5 (21%) unaccompanied youth (18-24) served through the homeless service system in 2020 exited homelessness into permanent housing. Only 26% of persons experiencing significant mental illness and only 17% of persons experiencing substance abuse disorder served through the homeless service system exited homelessness into permanent housing. Less than one-third (31%) of all persons served in emergency shelter or transitional housing in 2020 exited homelessness into permanent housing.</p> <p>Veterans; Families; African American households; Veterans make up a little over 10% of the homeless population, but the majority receiving services are diagnosed with chronic health conditions, including mental illness.</p> <p>Families receiving emergency housing services who are new to homelessness have a lower exit to permanent housing rate than those referred to permanent housing options.</p> <p>African American households are over-represented in all areas of housing assistance, and as such prioritization should be provided to improve position outcomes in regards to housing placement.</p>	<p>The CoC will accomplish the following towards this goal:</p> <ul style="list-style-type: none"> •The number of people exiting homeless into permanent housing will increase by 16%. •The number of people exiting shelter/interim housing into permanent housing will increase by 25%. •The number of unaccompanied youth and parenting youth (under 25) exiting homelessness into permanent housing will increase by 20%. •The number of people experiencing behavioral health issues exiting homelessness into permanent housing will increase by 10%. <p>The County will complement the CoC through the following:</p> <ul style="list-style-type: none"> •Percentage of African American households exiting homelessness to permanent housing will increase by 15%. •Reduce the length of time in shelter/interim housing and connections to permanent housing options by half. •Double current housing search services and activities.

Outcome Goal #4. Reducing the length of time persons remain homeless.

Goal Statement:

By the end of the performance period, HDIS data for **San Bernardino County** and the **City and County of San Bernardino CoC** will show **106** days as the average length of time that persons are enrolled in street outreach, emergency shelter, transitional housing, safehaven projects and time prior to move-in for persons enrolled in rapid rehousing and permanent housing programs annually, representing **35 fewer** days and a **25% reduction** from the baseline.

Goal Narrative:

Currently, individuals and families on average wait nearly 5 months to be connected to a permanent housing program. Improving CES and available housing options through better data management and faster enrollment services, the County and CoC will reduce the wait time for housing placement by over a month. This will result in families moving into permanent housing at a faster rate, helping to reduce the numbers of individuals and families seeking housing. Housing navigation and placement services will be connected through CES to accomplish this goal.

Outcome Goals July 1, 2022 - June 30, 2025

Baseline Data: Average length of time (in # of days) persons enrolled in street outreach, emergency shelter, transitional housing, safehaven projects and time prior to move-in for persons enrolled in rapid rehousing and permanent housing programs	Change in # of Days	Change as % of Baseline	Target Average length of time (in # of days) persons enrolled in street outreach, emergency shelter, transitional housing, safehaven projects and time prior to move-in for persons enrolled in rapid rehousing and permanent housing programs
<p style="text-align: center;">141</p>	<p style="text-align: center;">35</p>	<p style="text-align: center;">-25%</p>	<p style="text-align: center;">106</p>
Underserved Populations and Populations Disproportionately Impacted by Homelessness			
Describe any underserved and/ or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:	Describe the trackable data goal(s) related to this Outcome Goal: <i>Note: Meeting the trackable data goals for the underserved populations is not required for eligibility for Bonus Funds.</i>		
Households with at least 1 adult and 1 child assisted through the homeless service system in 2020 remained homeless for an average of 151 days. African American households assisted through the homeless service system in 2020 remained homeless for an average of 143 days. Latino households, although their average wait time is less at 116 days, collectively are composed of a large number of impacted individuals. People/households of multiple races assisted through the homeless service system in 2020 remained homeless for an average of 174 days. Over 75% of individuals who remain homeless the longest are considered BIPOC (Black, Indigenous, People of Color).	The CoC will accomplish the following towards this goal: •The average length of time persons in households with children remain homeless will be reduced by 51 days. •The average length of time African American households remain homeless will be reduced by 43 days. The County will complement the CoC through the following: •Decrease the length of time from entry into by-name list to CES by 25%. The CoC and County collectively will accomplish the following goal: •The average length of time that all BIPOC households remain homeless will be reduced by 25% from entry into CES to appropriate service connections.		

Outcome Goal #5. Reducing the number of persons who return to homelessness within two years after exiting homelessness to permanent housing.

Goal Statement:
By the end of the performance period, HDIS data for **San Bernardino County** and the **City and County of San Bernardino CoC** will show **2%** of people return to homelessness within 2 years after having exited homelessness to permanent housing, representing 190 **fewer** people and a **2% reduction** from the baseline.

Goal Narrative:
Baseline data shows 2,407 individuals entering into permanent housing each year. San Bernardino County/CoC recidivism rates show about 4% of successful housing exits return to homelessness within 2 years. The goal of the region is to reduce the 3-year recidivism rate by 2%. This will account for a 2% decrease within 2 years reflecting 48 fewer people exiting back into the streets and maintaining their housing.

Baseline Data: % of people who return to homelessness within 2 years after having exited homelessness to permanent housing	Outcome Goals July 1, 2022 - June 30, 2025		
	Change in % of People	Change as % of Baseline	Target % of people who return to homelessness within 2 years after having exited homelessness to permanent housing
<p style="text-align: center;">4%</p>	<p style="text-align: center;">2%</p>	<p style="text-align: center;">-50%</p>	<p style="text-align: center;">2%</p>

Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/ or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:	Describe the trackable data goal(s) related to this Outcome Goal: <i>Note: Meeting the trackable data goals for the underserved populations is not required for eligibility for Bonus Funds.</i>
--	--

<p>According to the landscape analysis provided, unaccompanied youth and parenting youth have a higher percentage of returns to homelessness within 6 months (14% and 10% respectfully) compared to all other groups in 2020. Also, the landscape analysis identified many BIPOC households with double digit percentage returns to homelessness within 6 months. In addition, 11% of persons experiencing severe mental illness and persons experiencing substance abuse disorder returned to homelessness within 6 months. And, 10% of Veterans and persons fleeing domestic violence returned to homelessness within 6 months.</p>	<p>The CoC and County collectively will accomplish the following goal:</p> <ul style="list-style-type: none"> •The percentage of transitional aged youth (18-25) who return to homelessness after exiting to permanent housing will be reduced by 25%. •The percentage of BIPOC households who return to homelessness after exiting to permanent housing will be reduced by 25%. •The percentage of persons experiencing severe mental illness and persons experiencing substance abuse disorder who return to homelessness after exiting to permanent housing will be reduced by 25%. •The percentage of Veterans and persons fleeing domestic violence who return to homelessness after exiting to permanent housing will be reduced by 25%.
---	--

Outcome Goal #6. Increasing successful placements from street outreach.

Goal Statement:
 By the end of the performance period, HDIS data for **San Bernardino County** and the **City and County of San Bernardino CoC** will show 414 total people served in street outreach projects exit to emergency shelter, safe haven, transitional housing, or permanent housing destinations annually, representing **207 more** people and a **100% increase** from the baseline.

Goal Narrative:
 San Bernardino County and the CoC are investing millions in state and federal funding to address street homelessness. The region currently has multiple teams funded to provide street outreach and engagement to reduce the numbers of unsheltered homeless.

Baseline Data: Annual # of people served in street outreach projects who exit to emergency shelter, safe haven, transitional housing, or permanent housing destinations.	Outcome Goals July 1, 2022 - June 30, 2025		
	Change in # of People	Change as % of Baseline	Target Annual Estimate of # of people served in street outreach projects who exit to emergency shelter, safe haven, transitional housing, or permanent housing destinations.
207	207	100%	414

Underserved Populations and Populations Disproportionately Impacted by Homelessness

Describe any underserved and/ or disproportionately impacted population(s) that your community will especially focus on related to this Outcome Goal and how this focus has been informed by data in your landscape assessment:	Describe the trackable data goal(s) related to this Outcome Goal: <i>Note: Meeting the trackable data goals for the underserved populations is not required for eligibility for Bonus Funds.</i>
<p>In 2020, only 25% of people enrolled in street outreach projects were successfully exited to a sheltered or permanent housing destination.</p> <p>In 2021, almost 3000 women and girls, over 1800 Hispanic/Latinos and over 1500 African Americans were enrolled in a street outreach project.</p> <p>In addition, almost 500 people identified as Chronically Homeless and over 750 people experiencing substance abuse disorder were enrolled in a street outreach project.</p> <p>High utilizers of services are individuals who utilize multiple public safety and safety net services such as healthcare (including inpatient and outpatient emergency care), criminal justice (including law enforcement, courts, and corrections), emergency response, and homeless services. High utilizers of services tend to be BIPOC, have chronic & physical health conditions, and are older.</p> <p>Transitional aged youth, although a smaller number countywide, have fewer positive outcomes compared to other groups and are more likely to return to the streets within 6 months of housing related services.</p>	<p>The CoC will accomplish the following towards this goal:</p> <ul style="list-style-type: none"> •100 high utilizers of services will be successfully placed from street outreach to a permanent housing destination. •The number of people successfully placed from street outreach to a sheltered or permanent housing destination will increase by 25%. •The number of chronically homeless people successfully placed from street outreach to a sheltered and/or permanent housing location will increase by 25%. <p>The County will complement the CoC through the following:</p> <ul style="list-style-type: none"> •In one year, 100 unsheltered high utilizers of services will exit homelessness, with 65% entering into stable housing and 35% connected to services to support housing and safety. <p>The CoC and County collectively will accomplish the following goal:</p> <ul style="list-style-type: none"> •The number of women and girls successfully placed from street outreach to a sheltered or permanent housing location will increase by 25%. •The number of BIPOC households successfully placed from street outreach to a sheltered or permanent housing location will increase by 25%.

----------	--

Reaching underserved and historically marginalized communities and populations	
Description	
wraparound services to get individuals the support they need to stabilize, begin healing, and exit homelessness in less restrictive, community-based care settings will help individuals transition from homeless to home. This may also require implementing policies that look at upstream prevention and early intervention. This includes aligning the County's network of housing and homeless services continuum of care to maximize the number of persons to be served, with a focus on equitable access. By working together to provide pathways to housing, health, and income stabilization, individuals experiencing homelessness can find their unique roadmap to recovery and self-sufficiency to prevent unnecessary incarcerations and hospitalizations.	<input checked="" type="checkbox"/> 1. Reducing the number of persons experiencing homelessness.
	<input type="checkbox"/> 2. Reducing the number of persons who become homeless for the first time.
	<input checked="" type="checkbox"/> 3. Increasing the number of people exiting homelessness into permanent housing.
	<input type="checkbox"/> 4. Reducing the length of time persons remain homeless.
	<input checked="" type="checkbox"/> 5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.
	<input checked="" type="checkbox"/> 6. Increasing successful placements from street outreach.
	<input checked="" type="checkbox"/> Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.
Timeframe	
July 2022 - June 2025	
Entities with Lead Responsibilities	
San Bernardino County Community Revitalization and Office of Homeless Services	
Measurable Targets	
100 unsheltered high utilizers of services will exit homelessness each year, resulting in 300 homeless exits by 2025.	

Strategy	Performance Measure to Be Impacted (Check all that apply)
Strengthening the quality or performance of housing and/or services programs	
Description	

Increasing shelter capacity. The County will build new partnerships with municipalities and the County's unincorporated areas to host emergency/transitional shelters with access to supportive services. This will be accomplished through the development of programs that improve community safety, test innovative low-barrier shelter solutions, and increase partnerships. Reducing barriers to shelter, such as allowing pets, storage of personal items, greater privacy, allowing access to service delivery partners, and longer and more flexible stays will help to create more low-barrier shelters.
Timeframe
July 2022 - June 2025
Entities with Lead Responsibilities
San Bernardino County Community Revitalization and Office of Homeless Services
Measurable Targets
Increase shelter bed capacity by 100 beds per year (total 300 beds).

- 1. Reducing the number of persons experiencing homelessness.
- 2. Reducing the number of persons who become homeless for the first time.
- 3. Increasing the number of people exiting homelessness into permanent housing.
- 4. Reducing the length of time persons remain homeless.
- 5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.
- 6. Increasing successful placements from street outreach.

Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy	Performance Measure to Be Impacted (Check all that apply)
Improving data quality, data systems, and/or data analyses to better inform decision-making	
Description	
Implementing an integrated approach to solving local unsheltered and sheltered homelessness by weaving together all outreach and engagement activities and data through Esri's ArcGIS (Geographic Information Systems) software for mapping and data visualization, and location services.	
Timeframe	
July 2022 - June 2025	
Entities with Lead Responsibilities	
	<ul style="list-style-type: none"> <input type="checkbox"/> 1. Reducing the number of persons experiencing homelessness. <input type="checkbox"/> 2. Reducing the number of persons who become homeless for the first time. <input checked="" type="checkbox"/> 3. Increasing the number of people exiting homelessness into permanent housing.

San Bernardino County Community Revitalization and Office of Homeless Services
Measurable Targets
Will conduct 56 case conference meetings per year to identify and recommend the most appropriate intervention.

- 4. Reducing the length of time persons remain homeless.
- 5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.
- 6. Increasing successful placements from street outreach.

Strategy
Expanding and strengthening cross-system partnerships and/or collaborative planning
Description
Implement system improvement and capacity building activities to facilitate greater system coordination, collaboration, resource alignment and performance outcomes to include but not limited to comprehensive systemwide workforce development activities, system supports to maintain homeless services & housing delivery system, and commitment to address racial disproportionality and equitable provision of services and outcomes.
Timeframe
July 2022 - June 2025
Entities with Lead Responsibilities
San Bernardino County Community Revitalization and Office of Homeless Services
Measurable Targets
Reducing the length of time from entry into a CES by-name list by 25%.

- Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.
- Performance Measure to Be Impacted
(Check all that apply)**
- 1. Reducing the number of persons experiencing homelessness.
 - 2. Reducing the number of persons who become homeless for the first time.
 - 3. Increasing the number of people exiting homelessness into permanent housing.
 - 4. Reducing the length of time persons remain homeless.
 - 5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.
 - 6. Increasing successful placements from street outreach.
 - Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Table 6. Funding Plan on Strategic Intent

Example Category intended to be Supported with HHAP 4	Approximate % of TOTAL HHAP 4 ALLOCATION to be used on this Example Use (%)	Approximate % of TOTAL HHAP 4 ALLOCATION to be used under this Example Use as part of the Youth Set Aside? (%)	Activities to be Supported with HHAP 4	How is this a strategic use of HHAP 4 resources that addresses needs and gaps within the homelessness response system?	How were these decisions to invest HHAP 4 into these activities informed by the planned uses of other state, local, and/or federal funding sources (as documented in the Landscape Analysis Narrative)?
1. Rapid rehousing	30%	5%	Targeted Rapid Rehousing projects and supportive services	Rapid rehousing (RRH) is an inexpensive and effective solution to move individuals and families who have fallen into homelessness into housing at a faster pace. Much of the funding received by the County and CoC is to provide permanent supportive housing (PSH) assistance. RRH assistance will complement funding already provided to the area.	Rapid rehousing (RRH) has been proven an effective tool in moving individuals and families back into permanent housing. During ARRA, under the Obama Administration, rapid rehousing was over 80% effective for placement. In addition, the San Bernardino County CoC recently conducted a cost analysis study showing the average cost to permanently house a family through RRH was approximately \$5,000 per family per year.
2. Operating subsidies	15%	2%	Capitalized operating support reserves to support housing programs that do not offer case management and operational cost for maintenance of units	Many recent housing programs for development of PSH need ongoing capitalized operating subsidy reserves to make these long-term programs viable and enticing for developers to participate with local government and the CoC. These commitments will allow programs more time to help locate additional funding for longer-term stability.	As a result of successful Homekey projects funded within the region, the long-term viability of these projects has focused the region to be proactive in investing funding to maintain PSH programs for longer periods, while providing funding that may be used in emergency situations to augment existing funds through supplementation.
3. Street outreach	8%		Street engagement and connection to resources through the CES and temporary shelter	Literally homeless individuals either lack the knowledge to effectively access mainstream and housing resources, or choose to avoid such services due to ongoing distrust in the system. Street Outreach is needed to provide the resources and education needed for the homeless community, and to establish rapport with homeless individuals and families.	San Bernardino County has been investing in a number of street outreach programs in collaboration with the local CoC. So far these programs have proven to be effective in reducing the number of individuals in known encampments and increasing access to available resources. Services such as this will reduce street homelessness.
6. Delivery of permanent housing	25%	3%	Innovative housing programs (such as development of PSH and PH)	As we have seen due to recent investments by the State of California, innovative housing development projects such as mobile/hotel conversions are a fast and inexpensive way to maximize housing for the homeless. Continued development of such programs will increase housing placements significantly and will align with the Governor's proposed statewide vision.	To date thousands of units have been created through innovative investments by the State of California. HHAP funding will provide more flexibility for the region to develop similar projects which will result in long-term housing investments for the region.
5. Systems support	15%		System improvements and capacity building	System improvement is continually needed to address the increase in homelessness and the successful response in lowering it throughout the region. Better understanding of data will help to improve resource access and education for homeless service providers will help to secure faster connections to services.	San Bernardino County is a region where capacity building issues have long been a problem. The James Irvine Foundation has noted San Bernardino County has one of the lowest per capita funding rates throughout the State. System improvements and capacity building investments will help to secure a better system, provision of services, and homeless service provider strengthening activities for the region.
10. Administrative (up to 7%)	7%		HHAP program administration for the Administrative Entity to oversee contracts and reporting to the State	The 7% of administrative costs provided to the Administrative Entity will help the agency to staff, monitor, report and process funding requests for agencies providing services.	These funds will help the Administrative Entity to oversee the funds per State requirements.
Total:	100%	10%
